## Steps for Case Study Solution Analysis:

### 1. Introduction of JetBlue Airways Managing Growth Case Solution

The JetBlue Airways Managing Growth case study is a Harvard Business Review case study, which presents a simulated practical experience to the reader allowing them to learn about real life problems in the business world. The JetBlue Airways Managing Growth case consisted of a central issue to the organization, which had to be identified, analysed and creative solutions had to be drawn to tackle the issue.

This paper presents the solved JetBlue Airways Managing Growth case analysis and case solution. The method through which the analysis is done is mentioned, followed by the relevant tools used in finding the solution.

The case solution first identifies the central issue to the JetBlue Airways Managing Growth case study, and the relevant stakeholders affected by this issue. This is known as the problem identification stage. After this, the relevant tools and models are used, which help in the case study analysis and case study solution. The tools used in identifying the solution consist of the SWOT Analysis, Porter Five Forces Analysis, PESTEL Analysis, VRIO analysis, Value Chain Analysis, BCG Matrix analysis, Ansoff Matrix analysis, and the Marketing Mix analysis. The solution consists of recommended strategies to overcome this central issue. It is a good idea to also propose alternative case study solutions, because if the main solution is not found feasible, then the alternative solutions could be implemented. Lastly, a good case study solution also includes an implementation plan for the recommendation

*Terminal Chaos* George L. Donohue, Russell D. Shaver, Eric Edwards, 2008 In total passenger miles air travel has never been more popular But as any frequent flyer knows air travel problems are growing even faster long lines lost luggage overbooking flight delays and serious safety issues And instead of doing something about it the traveling public seems simply to be sitting down buckling in and allowing itself to be treated like sheep But it doesn t have to be this way There are solutions to our air travel problems real solutions that can make real differences And they don t require 15 years to

implement With decades of experience in civil aviation and policy Drs George Donohue and Russell Shaver are well qualified to assess the problems in the system and offer responsible workable solutions Dr Donohue the current Director of the Center for Air Transportation Systems Research and a Professor of Systems Engineering at George Mason University GMU has extensive high level experience at the Federal Aviation Administration and the Defense Advanced Research Projects Agency DARPA Dr Shaver formerly a senior RAND Corporation research analyst and now a visiting research fellow at GMU served as chief scientist for policy analysis at the MITRE Center for Advanced Aviation System Development The stories they tell are compelling There are high profile horror stories passengers stranded for hours on the tarmac flights cancelled for bad weather when there s not a drop of rain anywhere near the flight path as well as an overall sense of apathy and obstructionism among those responsible for managing the industry Interestingly these problems are not the inevitable result of the size or complexity of the U S system Air transportation in Europe with almost identical air traffic control systems and safety standards is far better Amsterdam moves 30 per cent more passengers than Newark but the average flight delay is an order of magnitude lower In addition a European Passenger s Bill of Rights giving distressed passengers the right to substantial and immediate compensation has been a powerful incentive for non U S airlines to maintain their schedules So just how did we get where we are in the U S system today Donohue and Shaver cite multiple reasons that have combined to create the chaos we now face These causes include airline deregulation multiple governmental agencies with no central oversight or responsibility multiple corporate entities with conflicting agendas and a technologically outdated air traffic control system Even more importantly there seems to be a complete absence of advocacy for the customer the passengers The authors also explain that our air travel problems if left unaddressed are on a direct course to greatly impact the overall U S economy and harm our global competitiveness In 2006 alone delays and cancellations cost U S travelers an estimated 3 2 billion And in 2004 and 2005 the U S tourism industry is estimated to have lost 98 billion in revenue due to our air travel mess Fortunately Donohue and Shaver don t leave us in this state of chaos Their provocative analysis not only identifies the causes and extent of the problems but also provides us with a course heading to put us on the path to recovery The solutions they propose include holding the government decision makers responsible expanding the capacity of airports and airplanes modernizing the air traffic control system and implementing what the authors call the 30 per cent solution to significantly reduce congestion In short this book should be read by every airline passenger traveling in or through the United States As a country we simply can t afford to let the chaos continue
