The Visions of the Sleeping Bard Ellis Wynne, 2022-09-16 In *The Visions of the Sleeping Bard* Ellis Wynne weaves a tapestry of allegorical dreams and mystical experiences that reflect the rich tapestry of Welsh spiritual and literary tradition. Written in an era marked by the flowering of Renaissance thought, Wynne's prose is imbued with a poetic style that invites readers into a multi-layered examination of virtue, morality, and the influence of divine imagination. The book's surreal narrative structure, laden with visionary symbolism, engages with the cultural dialogues of its time, offering an introspective view of the human condition through the lens of a bard's introspections and otherworldly encounters. Ellis Wynne, a prominent figure in Welsh literature, emerged from a culturally vibrant background that informed his fascination with vision and morality. His life in the late 17th and early 18th centuries, coupled with the religious and philosophical currents of the time, deeply influenced his writing. Wynne's commitment to exploring the inner workings of the soul, particularly in contrast with the external worldly challenges, plays a crucial role in shaping the dreamlike quality of this work. Readers seeking a profound exploration of spiritual introspection will find *The Visions of the Sleeping Bard* both enlightening and thought-provoking. Its rich allegorical content and lyrical prose make it a significant contribution to the canon of Welsh literature, inviting modern readers to reflect on their own moral journeys and existential musings. Profiling Hackers Raoul Chiesa, Stefania Ducci, Silvio Ciappi, 2008-12-11 Complex and controversial, hackers possess a wily, fascinating talent, the machinations of which are shrouded in secrecy. Providing in-depth exploration into this largely uncharted territory, *Profiling Hackers: The Science of Criminal Profiling as Applied to the World of Hacking* offers insight into the hacking realm by telling attention-grabbing tales about bizarre characters that practice hacking as an art. Focusing on the relationship between technology and crime and drawn from the research conducted by the Hackers Profiling Project (HPP), this volume applies the behavioral science of criminal profiling to the world of internet predators. The authors reveal hidden aspects of the cyber-crime underground, answering questions such as: Who is a real hacker? What life does a hacker lead when not online? Is it possible to determine a hacker's profile on the basis of his behavior or types of intrusion? What is the motive behind phishing, pharming, viruses, and worms? After gaining notoriety for breaking into many high-profile computer systems, the Italian hacker Raoul Chiesa turned to ethical hacking in 1995. Today he uses his skills and abilities to find ways to protect networks and computer systems. Stefania Ducci is a member of the Counter Human Trafficking and Emerging Crimes Unit at the United Nations Interregional Crime and Justice Research Institute (UNICRI). Silvio Ciappi is a criminologist who lectures at the University of Pisa and studies criminal profiling. These three experts, with vastly different backgrounds, explore the clandestine network of cyber-criminals, providing an unparalleled glimpse into the
