Gary Flaxley - Resume - CV

Design photographer videographer

A Google Wave "resume" is such a thing created! Just not 100 percent. The founder of the idea. We use a lot of photos, illustrations, video, audio, and create about you as a professional. However, we do use it in a physical sense and not on a piece of paper. As a designer, I find it most rewarding when we can create an experience out of something ordinary. Something that can bring a smile to the face. Something that is not what you expect it to be. Something simple, yet with multiple layers of information. Something that you can gaze and get an idea of the story.

Can Google Wave do all this in a resume? I don't know. But what if you have the skill, if you do, email me at gflaxley@gmail.com

Also, take a look at my portfolio at www.gflaxley.com

Looking for a "normal" web resume? Check the business card icon - right hand corner, where I currently live.

Encyclopedia of Geography Barney Warf, 2010-09-21 Simply stated geography studies the locations of things and the explanations that underlie spatial distributions. Profound forces at work throughout the world have made geographical knowledge increasingly important for understanding numerous human dilemmas and our capacities to address them. With more than 1,200 entries, the Encyclopedia of Geography reflects how the growth of geography has propelled a demand for intermediaries between the abstract language of academia and the ordinary language of everyday life. The six volumes of this encyclopedia encapsulate a diverse array of topics to offer a comprehensive and useful summary of the state of the discipline in the early 21st century.

Key Features: Gives a concise historical sketch of geography's long, rich, and fascinating history, including human geography, physical geography, and GIS. Provides succinct summaries of trends such as globalization, environmental destruction, new geospatial technologies, and cyberspace. Decomposes geography into the six broad subject areas: physical geography, human geography, nature and society, methods, models, and GIS, history of geography, and geographer biographies, geographic organizations, and important social movements. Provides hundreds of color illustrations and images that lend depth and realism to the text. Includes a special map section.

Key Themes: Physical Geography, Human Geography, Nature and Society, Methods, Models, and GIS, People, Organizations, and Movements, History of Geography. This encyclopedia strategically reflects the enormous diversity of the discipline, the multiple meanings of space itself, and the diverse views of geographers. It brings together the diversity of geographical knowledge, making it an invaluable resource for any academic library.

New Trends in Internet Market Jose Manuel Garcia Sanchez, 2007-06-04 Inhaltsangabe Abstract Internet, Broadband access, Mobile telephony, Fixed telephony, TV, Google, Yahoo, Social networks, Mobile network operators, Telecommunication operators, Media conglomerates, Citizen media. All these terms have always been traditionally considered independent, but nowadays the interrelations among all of them happen more often and are becoming deeper. A new global scenario is being defined in which communications, entertainment, and information are converging, being provided by global conglomerates in our PCs, TVs, and mobile devices. Nowadays, technology advances will soon enable to provide users with the best internet experience on the go. Services hosts, access providers, vendors, media owners, and online players now realize that the barriers that traditionally have separated their markets dilute, bringing them all in a common global market. Internet business models have now to converge with traditional structures, and merges and acquisitions happen to reach competitive positions in foreign markets. The paradigm of internet will influence and change the most popular services as they are currently known. Fixed communication providers already suffer a loss of voice revenues in favor of the cheapest online communication. Mobile operators are facing now the same situations and find themselves on a delicate strategic situation with VoIP nearing a competitive QoS. Voice, along, doesn't seem to be for a long time enough as a unique revenue source. Even watching TV will be soon an enriched, personalized experience through the new IP end2end platforms. Will the online players

be the ones successfully accomplishing a vertical expansion of their business How will the mobile operators react Which will be the paper of the network access providers What about the media and content How will all that affect the customers In this document will be described the nowadays situation on the different markets involved in the converging scenario and how the respective players situate themselves strategically An initial global point of view will be followed by the definition of strategies and trends of each of them independently and the determination of the merging points and relations among them The effort will be focus firstly on offering recommendations and comparisons concerning specific environments Step by step the basis of the competition environment in the converging market will be defined offering a strategic map of the
