**Novel Methods and Technologies for Enterprise Information Systems** Felix Piazzolo, Michael Felderer, 2014-07-03

This volume presents the revised and peer reviewed contributions of the ERP Future 2013 conference held in Vienna Austria on November 12-13, 2013. The ERP Future 2013 Research conference is a scientific platform for research on enterprise information systems in general and specifically on core topics like business process management (BPM), business intelligence (BI), and enterprise resource planning (ERP) systems. Besides the scientific community, the event also addresses businesses developing, implementing, and intensively using enterprise information systems. To master the challenges of enterprise information systems comprehensively, the ERP Future 2013 Research conference accepted contributions with a business as well as an IT focus to consider enterprise information systems from various viewpoints. This combination of business and IT aspects is a unique characteristic of the conference that resulted in several valuable contributions with high theoretical as well as practical impact.

**Empirical Research for Software Security** Lotfi ben Othmane, Martin Gilje Jaatun, Edgar Weippl, 2017-11-28  
Developing secure software requires the integration of numerous methods and tools into the development process, and software design is based on shared expert knowledge, claims, and opinions. Empirical methods, including data analytics, allow extracting knowledge and insights from the data that organizations collect from their processes and tools, and from the opinions of the experts who practice these processes and methods. This book introduces the reader to the fundamentals of empirical research methods and demonstrates how these methods can be used to hone a secure software development lifecycle based on empirical data and published best practices.

**Software Quality. Increasing Value in Software and Systems Development** Dietmar Winkler, Stefan Biffl, Johannes Bergsmann, 2013-01-03  
This book constitutes the refereed proceedings of the 5th Software Quality Days Conference (SWQD) held in Vienna, Austria, in January 2013. This professional symposium and conference offers a range of comprehensive and valuable opportunities for advanced professional training, new ideas, and networking with a series of keynote speeches, professional lectures, exhibits, and tutorials. The seven scientific full papers accepted for SWQD were each peer reviewed by three or more reviewers and selected out of 18 high quality submissions. Further two keynotes and six short papers on promising research directions were also presented and included in order to spark discussions between researchers and practitioners. The papers are organized into topical sections on risk management, software and systems testing, test processes, model-based development, and process improvement and measurement.
