Flat-rate Tax United States. Congress. Senate. Committee on Finance,1983 **The Effects of Taxation on Multinational Corporations** Martin Feldstein,James R. Hines, Jr.,R. Glenn Hubbard,2007-12-01 The tax rules of the United States and other countries have intended and unintended effects on the operations of multinational corporations influencing everything from the formation and allocation of capital to competitive strategies The growing importance of international business has led economists to reconsider whether current systems of taxing international income are viable in a world of significant capital market integration and global commercial competition In an attempt to quantify the effect of tax policy on international investment choices this volume presents in depth analyses of the interaction of international tax rules and the investment decisions of multinational enterprises Ten papers assess the role played by multinational firms and their investment in the U S economy and the design of international tax rules for multinational investment analyze channels through which international tax rules affect the costs of international business activities and examine ways in which international tax rules affect financing decisions of multinational firms As a group the papers demonstrate that international tax rules have significant effects on firms investment and other financing decisions **Topics in Public Economics** David Pines,Efraim Sadka,Itzhak Zilcha,1998 The evolving modern world is characterized by two opposing trends integration and segregation On the one hand we witness strong forces for segregation on the basis of nationality ethnicity religion and culture in the former Soviet Union the former Czechoslovakia the former Yugoslavia as well as in Northern Ireland Spain and Canada These forces are quite strong and in some cases violent On the other hand the European Union and NAFTA represent the tendency for integration motivated primarily by economic considerations such as gains from trade and scale economies In fact these opposing trends can be explained by the concepts developed in modern club theory local public finance and international trade **The Bulletin of the National Tax Association** National Tax Association,1922 *Tax Planning Ideas* William J. MacKie-Mason,1994 Several recent papers argue that corporate income taxes should not be used by small open economies With capital mobility the burden of the tax falls on fixed factors e g labor and the tax system is more efficient if labor is taxed directly However corporate taxes not only exist but rates are roughly comparable with the top personal tax rates Past models also forecast that multinationals should not invest in countries with low corporate tax rates since the surtax they owe when profits are repatriated puts them at a competitive disadvantage Yet such foreign direct investment is substantial We suggest that the resolution of these puzzles may be found in the role of income shifting both domestic between the personal and corporate tax bases and cross border through transfer pricing Countries need cash flow corporate taxes as a backstop to labor taxes to discourage individuals from converting their labor income into otherwise

untaxed corporate income We explore how these taxes can best be modified to deal as well with cross border shifting *Gas Industry*, 1926 **City and State** Herbert Welsh, 1897 *Congressional Record* United States.
