The Hidden Language of Baseball Paul Dickson, 2019-09-01 Baseball is set apart from other sports by many things but few are more distinctive than the intricate systems of coded language that govern action on the field and give baseball its unique appeal During a nine inning game more than one thousand silent instructions are given from catcher to pitcher coach to batter fielder to fielder umpire to umpire and without this speechless communication the game would simply not be the same Baseball historian Paul Dickson examines the rich legacy of baseball's hidden language offering fans everywhere a smorgasbord of history and anecdote Baseball's tradition of signing grew out of the signal flags used by ships and hand signals used by soldiers during battle and were first used in games during the Civil War The Hartford Dark Blues appear to be the first team to steal signs introducing a larcenous obsession that as Dickson delightfully chronicles has given the game some of its most historic and outlandish moments In this revised and expanded edition through the 2018 season Dickson discusses recent developments and incidents including the illegal use of new technology to swipe signs A roster of baseball's greatest names and games past and present echoes throughout making The Hidden Language of Baseball a unique window on the history of our national pastime *iOS*

When using these apps, many users trustfully log everything from diet to sleep patterns. However, by sharing such personal information, end users may make themselves targets to misuse of this information by unknown third parties such as insurance companies. Despite the important role of informed consent in the creation of health and fitness applications, the intersection of ethics and information sharing is understudied and is an often ignored topic during the creation of mobile applications. *Privacy Concerns Surrounding Personal Information Sharing on Health and Fitness Mobile Apps* is a key reference source that provides research on the dangers of sharing personal information on health and wellness apps, as well as how such information can be used by employers, insurance companies, advertisers, and other third parties. It is ideally designed for policymakers, software developers, mobile app designers, legal specialists, privacy analysts, data scientists, researchers, academicians, and upper level students.
