Doing News Framing Analysis, 2009 [The Syrian Conflict in the News](#) Gabriel Huland, 2024-02-22

The Syrian conflict constitutes one of the most covered events in this century. Although the coverage of the Syrian uprising and civil war alternated between periods of saturation and silence, it is indisputable that they received an enormous amount of media attention. *The Syrian Conflict in the News* analyses the coverage of the Syrian conflict in the *New York Times*, the *Washington Post*, and the *Wall Street Journal*, focusing on how the three newspapers framed six key events in Syria from March 2011 to April 2018, including the Ghouta chemical attack, the Russian intervention in Syria, and US-led airstrikes. Gabriel Huland argues that US foreign policy dominates the frames of the conflict, which suggests that mainstream newspapers are excessively indexed to elite narratives. In the United States, the Syrian crisis prompted an intense debate about the appropriate degree of US involvement in the civil war and how the country should behave in the face of growing Russian and Iranian influence in the Middle East. The overreliance on elite narratives resulted in the underrepresentation of local voices and other players who were in a more advantaged position to devise solutions to the conflict. By analysing the frames of the Syrian uprising and civil war in three mainstream newspapers and the relationship between media and international conflicts, *The Syrian Conflict in the News* sheds light on crucial aspects of the crisis currently pervading US journalism.

De Gruyter Handbook of Media Psychology Rachel L. Bailey, Glenna L. Read, 2025-10-05

This book presents a survey of contemporary research investigating the psychological processes related to media consumption. As a rapidly growing and changing sub-discipline of mass communication, Media Psychology analyzes how media facilitate communication and how communication in turn shapes attitudes, emotions, and behavior. The handbook addresses leading ideas and debates in media psychology, persisting lines of inquiry, and new areas of interest. Adopting an organizational approach that embraces a dynamic systems perspective, the book is subdivided into sections that examine nested components of the larger system in question, such as audiences, messages, content, and context, while also acknowledging that they do not function in isolation.

Representing Rural Women Margaret Thomas-Evans, Whitney Womack Smith, 2019-06-27

Representing Rural Women highlights the complexity and diversity of representations of rural women in the US and Canada from the nineteenth to twenty-first centuries. The 15 chapters in this collection offer fresh perspectives on representations of rural women in literature, popular culture, and print, digital, and social media. They explore a wide range of time periods, geographic spaces, and rural women's experiences, including Mormon pioneer women, rural lesbians in the 1970s, Canadian rural women's organizations, and rural trans youth. In their stories, these women and girls navigate the complex realities of rural life, create spaces for self-expression, develop networks to communicate their experiences, and challenge misconceptions and stereotypes of rural womanhood. The chapters in this collection consider the ways that rural geography allows freedoms as well as imposes constraints on women's lives and explore how cultural representations of rural womanhood both reflect and shape
