Networks '98: Ieee Sicon'98: Proceedings Of The 6th Ieee Singapore International Conference Akkihebbal L Ananda, Hung Keng Pung, Weiguo Wang, 1998-06-22 This book is aimed at scientists, technologists, engineers and undergraduate and graduate students involved in analytical and process biochemistry and biotechnology. It reviews the potentialities of light emitting reaction associated with the sensor approach. The book introduces the concepts of sensors and biosensors and places bio and chemi luminescent sensors in the general context of biosensors. It then briefly describes luminescence phenomena and provides some basic knowledge necessary for understanding and exploiting light emitting reactions. These luminescence reactions important from an analytical standpoint are described. Also the applications of bio and chemi luminescence which make use of immobilized reagents are explained. Finally there is discussion of bio and chemi luminescent sensors most of them including fiber optics. *Parallel and Distributed Processing and Applications* Jiannong Cao, Laurence T. Yang, Minyi Guo, Francis Lau, 2005-01-17

Welcome to the proceedings of the 2nd International Symposium on Parallel and Distributed Processing and Applications ISPA2004 which was held in Hong Kong, China, 13-15 December 2004. With the advance of computer networks and hardware technology, parallel and distributed processing has become a key technology which plays an important part in determining future research and development activities in many academic and industrial branches. It provides a means to solve computationally intensive problems by improving processing speed. It is also the only approach to building highly reliable and inherently distributed applications. ISPA2004 provided a forum for scientists and engineers in academia and industry to exchange and discuss their experiences, new ideas, research results and applications about all aspects of parallel and distributed computing. There was a very large number of paper submissions, 361 from 26 countries and regions including not only Asia and the Pacific but also Europe and North America. All submissions were reviewed by at least three program or technical committee members or external reviewers. It was extremely difficult to select the presentations for the conference because there were so many excellent and interesting submissions. In order to allocate as many papers as possible and keep the high quality of the conference, we finally decided to accept 78 regular papers and 38 short papers for oral technical presentations. We believe that all of these papers and topics not only provide novel ideas, new results, work in progress and state of the art techniques in this field but also stimulate the future research activities in the area of parallel and distributed computing with applications. *Smart Technologies in Healthcare Management* Nidhi Sindhwani, Sarvesh Tanwar, Ajay Rana, Ramani Kannan, 2024-06-28 Offering a holistic view of the pioneering trends and innovations in smart healthcare management, this book focuses on the methodologies, frameworks, design issues, tools, architectures and technologies necessary to develop and understand intelligent healthcare systems and emerging applications in the present era. *Smart Technologies in Healthcare Management: Pioneering Trends and Applications* provides

an overview of various technical and innovative aspects challenges and issues in smart healthcare along with recent and novel findings It highlights the latest advancements and applications in the field of intelligent systems and explores the importance of cloud computing and the design of sensors in an IoT system The book offers algorithms and a framework with models in machine learning and AI for smart healthcare management A detailed flow chart and innovative and modified methodologies related to intelligent computing in healthcare are discussed as well as real world based examples so that readers can compare technical concepts with daily life concepts This book will be a useful reference for academicians and the healthcare industry along with professionals interested in exploring innovations in varied applicational areas of AI IoT and machine learning Researchers startup companies and entrepreneurs will also find this book of interest

Mobile Computing, 2E Asoke K. Talukdar, 2010-07-10 Mobile Computing technology addresses challenges that enable the realization of the global village concept where people can seamlessly access any information from anywhere through any device while stationary or even at a state of mobility This book covers all the communication technologies starting from First Generation to Third Generation cellular technology wireless LAN WiFi and wireless broadband WiMax It covers intelligent networks IN and emerging technologies like mobile IP IPv6 and VoIP Voice over IP Written by a professional who has worked on several technologies the book is replete with illustrations examples programs interesting asides and much more A storehouse of the most recent developments in the world of wireless the book aims to fulfill the growing information and knowledge needs of a vast segment of interested audience students professionals teachers and even non technical people Since it provides the big picture of all the technologies from CTI computer technology interface to 3G third generation including Bluetooth IN WiFi and WiMax as well as the service creation aspects the book will be an indispensable repository of contemporary developments in the ever expanding field of wireless services and mobile computing
