Visions of Invasion Michael Lechuga, 2023-03-02 Visions of Invasion Alien Affects Cinema and Citizenship in Settler Colonies explores how the US government mobilizes media and surveillance technologies to operate a highly networked multidimensional system for controlling migrants Author Michael Lechuga focuses on three arenas where a citizenship control assemblage manufactures alienhood Hollywood extraterrestrial invasion film federal antimigration and border security legislation and various immigration enforcement protocols implemented along the Mexico United States border Building on rhetorical studies settler colonial studies and media studies Visions of Invasion offers a glimpse at how the processes of alien making contribute to an ongoing settler colonial project in the US Lechuga demonstrates that popular films The War of the Worlds Predator Men in Black and more participate in the production of migrants as subjective terrorists felons and other noncitizen personae vilified in public discourse Beyond just tracing how alien invasion narratives circulate in popular media Lechuga describes how the logics motivating early US colonists materialize in both the US's citizenship control policy and in some of the country's most popular texts Beneath each of the film franchises and antimigrant political expressions described in Visions of Invasion lies an anxious colonial logic in which the settler way of life is seemingly threatened by false narratives of imminent invasion from abroad The volume offers a deep dive into how the rhetorical figure of the alien has been manufactured as a political subjectivity one that plays out the

One clearly evident dimension is research. Certain authors introduce quite new intellectual approaches into scientific debate. This requires a special frame of mind and a searching curiosity about social reality. Carl Gustav Jung identified a phenomenon which he called systematic blindness: when a science reaches a stage of maturity and equilibrium it categorically refuses from a sense of self-preservation to note certain facts and phenomena which it finds inconvenient. In Alexander Dolgin's book whole complexes of such non-canonical material are to be found. Here are just a few examples: exchange networks through which digital works of art are spread through the Internet; bargain sales of fashionable clothing; the paradox of equal pricing of cultural goods of varying quality; and a discussion of whether art or business has the more productive influence on creativity. Obviously not all the issues Dolgin raises are totally new but brought together and examined within an elegant logical framework of informational economics they pose a challenge to scientific thinking. Such challenges are by no means immediately or in some cases ever acclaimed by the scientific establishment. J. K. Galbraith, for example, a great American economist whose works are read throughout the world, who introduced a whole range of crucially important concepts, the director of John F. **The New York Dramatic Mirror** ,1909 **S.A.
