Incompleteness Mobility and Conviviality Francis Nyamnjoh, 2023-12-05 Central to the Jensen Memorial Lectures 2023 is an invitation to take incompleteness seriously in how we imagine relate to and seek to understand a world in perpetual motion Despite our instinct for and obsession with completeness we are constantly reminded that the sooner one recognises and provides for incompleteness and the conviviality it inspires as the normal way of being the better we are for it Fluidity compositeness and the capacity to be present in multiple places and forms simultaneously in whole or in fragments are core characteristics of reality and ontology of incompleteness How would we frame our curiosities and conversations about processes relationships and phenomena with an understanding of the universality of incompleteness and mobility West and Central Africa for example are regions where it is commonplace to embrace and celebrate incompleteness in nature the suprasensory human beings human actions human inventions and human achievements The lectures indicate how we could draw inspiration in this regard to inform current clamours for decolonisation and the growing ambivalence about rapid advances in digital technologies artificial intelligence AI in particular as well as with twenty first century concerns about migrants and strangers knocking at the doors of opportunities we feel more entitled to as bona fide citizens and insiders The lectures draw on the writings of Amos Tutuola as well as from popular ideas of personhood and agency in Africa to make a case for sidestepped and silenced traditions of knowledge They highlight Africa s possibilities prospects and emergent capacities for being and becoming in tune with the continent s creativity and imagination They speak to the nimble footed flexible minded frontier African at the crossroads and

junctions of myriad encounters facilitating creative conversations and challenging regressive logics of exclusionary claims and articulation of identities and achievements The traditions of knowledge discussed in these lectures do not only speak to Africans but to the world as the philosophies explored have universal application The crucial anthropological question of relationality and othering is at the heart of this original and enlightening book Nyamnjoh cautions the missionaries of decoloniality against the risk of substituting one illusion of completeness with another For him incompleteness is the basis of any healthy exchange He therefore recommends embracing the universality of incompleteness in motion and taking seriously an ancestral tradition of self extension through creative imagination in this anxious age of artificial intelligence Forcefully argued and abundantly substantiated with finesse and laughter that run through it this book will be a milestone by making us rediscover the demands and the magic of fieldwork Prof Dr Mamadou Diawara Goethe University Frankfurt Main Frobenius Institut Frankfurt Main Point Sud Bamako Mali

Proceedings of ELM2019 Jiuwen Cao, Chi Man Vong, Yoan Miche, Amaury Lendasse, 2020-09-11 This book contains some selected papers from the International Conference on Extreme Learning Machine 2019 which was held in Yangzhou China December 14 16 2019 Extreme Learning Machines ELMs aim to enable pervasive learning and pervasive intelligence As advocated by ELM theories it is exciting to see the convergence of machine learning and biological learning from the long term point of view ELM may be one of the fundamental learning particles filling the gaps between machine learning and biological learning of which activation functions are even unknown ELM represents a suite of machine and biological learning techniques in which hidden neurons need not be tuned inherited from their ancestors or randomly generated ELM learning theories show that effective learning algorithms can be derived based on randomly generated hidden neurons biological neurons artificial neurons wavelets Fourier series etc as long as they are nonlinear piecewise continuous independent of training data and application environments Increasingly evidence from neuroscience suggests that similar principles apply in biological learning systems ELM theories and algorithms argue that random hidden neurons capture an essential aspect of biological learning mechanisms as well as the intuitive sense that the efficiency of biological learning need not rely on computing power of neurons ELM theories thus hint at possible reasons why the brain is more intelligent and effective than current computers The main theme of ELM2019 is Hierarchical ELM AI for IoT Synergy of Machine Learning and Biological Learning This conference provides a forum for academics researchers and engineers to share and exchange R D experience on both theoretical studies and practical applications of the ELM technique and brain learning This book covers theories algorithms and applications of ELM It gives readers a glance of the most recent advances of ELM
