Prep Ideas For Beginners and Dummies Barbara Dawson, 2020-08-18 Meal prepping is making a meal or recipe then portioning it out to grab and go meals for later If you've ever kept your leftovers from dinner to take with you for lunch then next time you've had mini meal prepped. Generally though meal prepping refers to making 3-7 days worth of food at a time Think of it like making lunches for the week all at once instead of making your lunch every day You can use this same technique for breakfast lunch dinner and snacks Meal prepping isn't necessarily a waste and is a great way to get outside your line whether that's planning a diet or a budget When making your meal plan the first question you should ask is will you be able to eat healthy meals without having to do it every day? Meal prepping is not for everyone It is a great value convenience and often more than just a diet With meal prepping you generally eat the same thing for a few days in a row so if you don't like leftovers or get bored with food meal prepping isn't for you If having nutritious meals that maximize your time and budget is more valuable to you than doing something different every day meal prepping is a great idea I've generally not seen meal prepping for the individual or maybe one other person do a whole family Meal prepping for a whole family would be quite difficult but the result would be a meal that is stored in the refrigerator for a slow day in a week In addition to the way food is packed the individual nuances of your refrigerator can impact the quality of your refrigerated meals. The refrigerator's acceptable humidity and flavor will be a subject to the eater Always begin with the refrigerator's guidelines to be the FDA and then evaluate them against your own preferences In g
