Analysing Design Activity:

Analysing Design Activity Nigel Cross, Henri Christiaans, Kees Dorst, 1997-01-23 Design encompasses some of the highest cognitive abilities of human beings including creativity synthesis and problem solving A substantial and varied range of research methods has been developed and adopted for the analysis of design activity but until now it has been difficult to compare the work of different researchers using different methods This book contains the results of an international workshop held in Delft The Netherlands which focused on one particular research method that of protocol analysis Researchers from seventeen different leading centres around the world were invited to analyse the same video recordings of designers working on an engineering product design The 20 chapters in this book are the records of that workshop providing rich insights into the design process and an overview of accumulated knowledge on design from these researchers There is also a discussion of the properties and limitations of protocol analysis as a research technique for analysing design activity The book is a substantial contribution to developing understanding of the nature of design activity and is of value to researchers teachers and practitioners of design

Analysing Design Activity Kees Dorst, Technische Universiteit Faculteit van het Industrieel Ontwerpen, Workshop on Research in Design Thinking, 1995 *Analysing Design Thinking: Studies of Cross-Cultural Co-Creation* Bo Christensen, Linden J. Ball, Kim Halskov, 2017-08-03 The scientific analysis of design thinking continues to burgeon and is of considerable interest to academic scholars and design practitioners across many disciplines This research tradition has generated a growing corpus of studies concerning how designers think during the creation of innovative products although less focus has been given to analysing how designers think when creating less tangible deliverables such as concepts and user insights *Analysing Design Thinking Studies of Cross Cultural Co Creation* brings together 28 contributions from internationally leading academics with a shared interest in design thinking who take a close look at professional designers working on a project that not only involves soft deliverables but where a central role is played by co creation across multiple culturally diverse stakeholders This collection of detailed multi method analyses gives a unique insight into how a Scandinavian design team tackled a specific design task within the automotive industry over a four month design process All papers draw upon a common video based dataset and report analyses that link together a diversity of academic disciplines including psychology anthropology linguistics philosophy architecture management engineering and design studies The dataset affords multiple entry points into the analysis of design thinking with the selected papers demonstrating the application of a wide range of analytic techniques that generate distinct yet complementary insights Collectively these papers provide a coherent framework for analysing and interpreting design thinking in vivo through video based field studies

Quantitative Methods for Studying Design Protocols Jeff WT Kan, John S Gero, 2017-06-13 This book is aimed at researchers and students who would like to engage in and deepen their understanding of design cognition research The book presents new approaches for analyzing design thinking and proposes methods of measuring design processes These methods seek to quantify design issues and design processes that are defined based on notions from the Function Behavior Structure FBS design ontology and from linkography A linkograph is a network of linked design moves or segments FBS ontology concepts have been used in both design theory and design thinking research and have yielded numerous results Linkography is one of the most influential and elegant design cognition research methods In this book Kan and Gero provide novel and state of the art methods of analyzing design protocols that offer insights into design cognition by integrating segmentation with linkography by assigning FBS based codes to design moves or segments and treating links as FBS transformation processes They propose and test information entropy as a means to capture the information carried by a linkograph and correlate it with the design outcomes

Design Thinking Nigel Cross, 2023-06-15 Design thinking is the core creative process for any designer this book explores and explains this apparently mysterious design ability This new edition is a completely revised updated and extended version of a classic text Focusing on what designers actually do when they are designing the book is structured around a series of in depth case studies of the work of outstanding and expert designers interwoven and developed with commentary and comparison The coverage reflects the breadth of design from architecture to engineering consumer products to communications and from individual designing to teamwork and collaborative designing The scale of designing ranges from Formula One racing cars to city commuting cars locomotives to bicycles sewing machines to litter bins and lemon squeezers The book is based on evidence from observation and investigation of design practice providing insights into and understanding of design thinking and the development of design ability from novice to expert This second edition of *Design Thinking Understanding How Designers Think and Work* offers an overview from one of design s most experienced and influential scholars Nigel Cross goes to the heart of what it means to think and work as a designer It is
