Conte,Rodrigo Astroza,Gianmario Benzoni,Glauco Feltrin,Kenneth J. Loh,Babak Moaveni,2017-10-11 This edited volume presents selected contributions from the International Conference on Experimental Vibration Analysis of Civil Engineering Structures held in San Diego California in 2017 EVACES2017 The event brought together engineers scientists researchers and practitioners providing a forum for discussing and disseminating the latest developments and achievements in all major aspects of dynamic testing for civil engineering structures including instrumentation sources of excitation data analysis system identification monitoring and condition assessment in situ and laboratory experiments codes and standards and vibration mitigation Machine Learning Applied to Composite Materials Vinod Kushvaha,M. R. Sanjay,Priyanka Madhushri,Suchart Siengchin,2022-11-29 This book introduces the approach of Machine Learning ML based predictive models in the design of composite materials to achieve the required properties for certain applications ML can learn from existing experimental data obtained from very limited number of experiments and subsequently can be trained to find solutions of the complex non linear multi dimensional functional relationships without any prior assumptions about their nature In this case the ML models can learn from existing experimental data obtained from

1 composite design based on various properties of the matrix material and fillers reinforcements 2 material processing during fabrication 3 property relationships Modelling of these relationships using ML methods significantly reduce the experimental work involved in designing new composites and therefore offer a new avenue for material design and properties The book caters to students academics and researchers who are interested in the field of material composite modelling and design
