examines the time spent in schools and the benefits and challenges of a modified school calendar **Global report on teachers** International Task Force on Teachers for Education 2030, UNESCO, 2024-02-24 Teachers are central to unlocking every learner's potential and achieving Sustainable Development Goal 4 of inclusive equitable and quality education for all. Regrettably, worldwide teacher shortages have been endangering the future of education. New data collected for the Global Report on Teachers indicates that 44 million additional teachers are needed to achieve universal primary and secondary education by 2030. Shortages are widespread, with sub-Saharan Africa needing 15 million more teachers while higher income countries face retention challenges resulting in teachers massively leaving the profession. Echoing calls from the International Commission on the Futures of Education and the 2022 Transforming Education Summit, this report advocates for dignifying, diversifying, and valorizing the teaching profession. It emphasizes the importance of improved working conditions, enhanced professional development, and increased teacher involvement in decision making to bridge the gap. This report is a tool to mobilize international and country efforts to empower, recruit, train, and support teachers within resilient education systems for a collaborative, innovative, and cohesive teaching profession. It is a roadmap aiming to elevate the status of the teaching profession and ensure quality education for all learners, urging immediate action.

Revolutionary Struggles and Girls' Education Thera Mjaaland, 2021-07-27 Revolutionary Struggles and Girls Education At the Frontiers of Gender Norms in North Ethiopia argues that at the base of girls' poorer performance than boys at secondary school level when puberty has set in is the symbolic violence entailed in sanctioned femaleness. Informed by the modesty of Virgin Mary in Orthodox Christian veneration, it instructs girls to internalize a holding back which impinges on her self-efficacy and ability to be an active learner. Neoliberally informed educational policies and plans which have co-opted liberal feminism also in Ethiopia do not address hard-lived gender norms and the power and domination dynamics entailed when parity between boys and girls in school continues to be the dominant measure for equity. Despite women's courageous contribution at a literal frontier during the Tigrayan liberation struggle 1975-91 where they fought on equal terms with men and despite the tendency that girls outnumber boys at secondary level in the present context, sanctioned femaleness constitutes a frontier for girls' educational success and transition to higher education. In fact, when teaching/learning continues to be based on memorization rather than critical thinking, the very transformative potential of education is undermined, also in a gendered sense.

Revised Code of Washington Washington (State), 2021 **Getting Evidence into Education** Stephen Gorard, 2020-03-31 Worldwide there has been considerable progress in the quality of research evidence generated for use in education, but not the equivalent growth in knowledge of how best to get this evidence into actual use. Yet, with far-reaching implications, all of education is damaged when persuasive but poor quality evidence has widespread influence or good research lies unused.
