The Kalām Cosmological Argument: A Reassessment Jacobus Erasmus, 2018-01-08 This book offers a discussion of the kal m cosmological argument and presents a defence of a version of that argument after critically evaluating three of the most important versions of the argument It argues that since the versions of the kal m cosmological argument defended by Philoponus c 490 c 570 al Ghaz l 1058 1111 and the contemporary philosopher William Lane Craig all deny the possibility of the existence of an actual infinite these arguments are incompatible with Platonism and the view that God foreknows an endless future This conclusion however is not a problem for the proponents of the kal m cosmological argument for the book shows how the argument can be defended without denying the possibility of the actual infinite In order to offer a comprehensive analysis of Philoponus and al Ghaz l s cosmological

arguments the book draws on recent English translations of some of their works Next the book advances a detailed argument against the popular argument based on the impossibility of an actual infinite Finally the book offers a unique defence of the kal m cosmological argument by defending philosophical arguments for a beginning of time that do not deny the actual infinite evaluating which hypothesis best explains the discoveries of modern cosmology and offering an argument in support of the premise that if the universe came into existence then God brought it into existence
