**Postcolonial Language Varieties in the Americas** Danae Maria Perez, Eeva Sippola, 2021-06-08 In the Americas both indigenous and postcolonial languages today bear witness of massive changes that have taken place since the colonial era However a unified approach to languages from different colonial areas is still missing The present volume studies postcolonial varieties that emerged due to changing linguistic and sociolinguistic conditions in different settings across the Americas The studies cover indigenous languages that are undergoing lexical and grammatical change due to the presence of colonial languages and the emergence of new dialects and creoles due to contact The contributions showcase the diversity of approaches to tackle fundamental questions regarding the processes triggered by language contact as well as the wide range of outcomes contact has had in postcolonial settings The volume adds to the documentation of the linguistic properties of postcolonial language varieties in a socio historically informed framework It explores the complex dynamics of extra linguistic factors that brought about the processes of language change in them and contributes to a better understanding of the determinant factors that lead to the emergence and evolution of such codes

**Here - Hither - Hence and Related Categories** Julia Nintemann, Maja Robbers, Nicole Hober, 2020-07-20 As a follow up study to the global comparison of spatial interrogatives *Studia Typologica* 20 the present book examines the spatial declarative counterparts which are provided by the expression class of spatial deictic adverbs In a functionally motivated typological approach equivalents of Early Modern English here hither hence and there thither thence are identified across a sample of 250 languages from all macro areas These are also quantitatively assessed to extrapolate areal and global trends of coding patterns The formal relationships between spatial interrogative and spatial declarative paradigms are analyzed with a focus on the syncretism of categories and of individual cells Qualitative discussions of patterns precede in depth treatments of problematic cases and other relevant issues related to the research topic The quantitative results strongly point to areal linguistic trends concerning the distribution of distinct and non distinct coding of the three spatial relations Place Goal and Source Additional aspects such as quantitative evaluations of constructional complexity are addressed subsequently

**Spatial Interrogatives in Europe and Beyond** Thomas Stolz, Nataliya Levkovich, Aina Urdze, Julia Nintemann, Maja Robbers, 2017-08-07 The extant generalizations about the grammar of space rely heavily on the analyses of declarative sentences There is a need to check whether these generalizations also hold in the domain of interrogation To this end this book analyzes data from some 450 languages including non standard varieties The focus is on paradigms of spatial interrogatives such as English where whither and whence and their internal organization These paradigms are checked for recurrent patterns of morphological mismatches such as syncretism and different degrees of complexity e.g. the number of segments The data base consists of a large parallel literary corpus *Le petit prince* and translations thereof which is complemented by further sources of information such as descriptive grammars The data are analyzed from a synchronic perspective However diachronic issues are addressed unsystematically too It is shown that the distribution of phenomena which characterize paradigms of spatial interrogatives are subject to areal linguistic factors This is the first typological study of spatial interrogatives It provides new insights for students of the grammar of space morphological paradigms and language typology
