The stack is divided into four layers: 'Application', 'Transport', 'Network', and 'Link'. Below this, a 'Host' is shown with its own 'TCP/IP Stack' and a 'Network Interface'. The 'Host' is connected to a 'Network' which contains multiple 'Hosts'. A 'Server' is also shown connected to the network. The diagram illustrates the flow of data from the application layer through the transport, network, and link layers, and vice versa, across the network.
