Masters Theses in the Pure and Applied Sciences Wade H. Shafer, 2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived published and disseminated by the Center for Information and Numerical Data Analysis and Synthesis CINDAS at Purdue University in 1957 starting its coverage of theses with the academic year 1955 Beginning with Volume 13 the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor Michigan with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities All back issues can also be ordered from Plenum We have reported in Volume 34 thesis year 1989 a total of 13 377 theses titles from 26 Canadian and 184 United States universities We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work While Volume 34 reports theses submitted in 1989 on occasion certain

universities do report theses submitted in previous years but not reported at the time

Digital Organizations - Leadership Disrupted
Ganesh Shermom, 2016-12-08 Discover the Digital Organization. We think of organizations as an amorphous large complex institutions. True but organizations are also symbols of its people who aspired, nurtured and struggled away to make it work, not to forget its collection of stories, rituals, episodes, values, experiences that can be broadly summarized and called as the culture. And the ethics that their organizations display today and in times to come. Organizations are products of a leader's imagination. It takes the shape of that dream. And in that dream, good or bad, lies its destiny. Leadership is disrupted owing to digital influences in technology, knowledge, millennial mindset, people attitudes, skills, behaviors, rapid changes in customer needs, speed and agility, flexible structures, dynamic creative designs, unique people actions, expectations and deliverance, talent issues, business climate, HR programs, work values and business ethics, all displayed as culture. A Digital Mind Set all about Leadership.

The Tubular Thermosyphon
G. S. H. Lock, 1992 The tubular thermosyphon is a very simple idea for transferring heat. Fluid inside a tube is circulated by buoyancy forces and thus carries thermal energy from the hot end to the cold end with great efficiency. The device has many uses from cooling equipment and machinery to recovering waste heat.

recovery and conserving energy However the actual operating details of the thermosyphon are more complex and change dramatically with the circumstances The length and diameter of the tube the nature and state of the fluid the strength and variation of the body force field all influence the internal circulation pattern and thus create different operating characteristics This book deals with each of these variations thoroughly and systematically Emphasis is placed on the physical principles underlying thermal behavior under single phase or evaporative conditions whether the tube is stationary or rotating and whether it is straight or bent Consideration is also given to other devices having a similar purpose This study will be of special interest to mechanical chemical electrical and geotechnical engineers and graduate students concerned with thermosyphon technology
