Innovative Solutions and Sustainable Practices for a Resilient Future Terri-Ann Berry, Leopoldo Mendoza-Espinosa, Jo Burgess, Ferdinand Oswald, 2025-06-17 United Nations Sustainable Development Goals (SDGs) serve as a blueprint to address the world's most pressing challenges such as poverty, inequality, climate change, and biodiversity loss. Research plays a pivotal role in understanding these complex issues, providing evidence-based insights to guide policy formulation, program development, and implementation strategies. Smart sustainable development refers to an innovative, forward-thinking, and/or technologically advanced approach that combines innovative solutions with sustainable practices to promote long-term environmental, social, and economic well-being. This Research Topic has been created in collaboration with an international event comprising online and face-to-face opportunities to highlight practical solutions to sustainability in line with the United Nations SDGs. This presents a unique opportunity for a wide range of sustainable practitioners from academia, industry, and communities to present research works and projects with an innovation focus, enabling international networking and knowledge sharing to support a more sustainable and inclusive future. This Research Topic seeks to investigate both complete or ongoing projects introducing innovative solutions that are strongly aligned with the UN SDGs and have led to tangible outcomes with remarkable impact and benefit to sustainable development. The key aspects contributing to smart sustainable development include technological integration, environmental stewardship, social equity, economic prosperity, resilient communities, and infrastructure and collaboration and governance. We welcome contribution from individual researchers, academic groups, and partnerships between academics and professionals. Research focused on using innovation to bridge the gap between global aspirations and local realities, taking into account diverse cultural, social, economic, and environmental contexts, is particularly welcome. Topics can cover but are not limited to the following themes: Smart technologies to further sustainable development including in built environment, biotechnologies, energy systems, health care, education, transportations, and emergency and disaster risk management; Sustainable infrastructure including policies, creative design, and the implementation of new methods, materials, and approaches to the planning, construction, and use of sustainable buildings, water and wastewater management, stormwater design, and solid waste management; Digitalization and intelligence for the uptake of sustainable solutions including through smart energy systems, mobility, digital transformation, and disruption; Resilience and disaster management and the growth of digital cities; Community and healthcare solutions to benefit gender equality, community development, indigenous peoples, and the preservation of local region and national cultural heritage in new ways; Nature resource protection and management approaches including environmental conservation, water sensitive design, coastal erosion systems, solutions, and adaptation to climate change; Sustainable agricultural initiatives to increase the uptake and use of new approaches and methods including ones which incorporate creative solutions to supporting natural ecosystems.

web jul 15 2019 the pir sensor stands for passive infrared sensor which can detect many levels of radiations as it is well known that every object emits some radiation and hotter materials emit more radiations than other materials interfacing pir sensor with pic microcontroller iot based security system with voice message using esp8266

design and implementation of pyroelectric infrared sensor based - May 03 2023

web jun 2 2011 this paper evaluates the development of a low cost security system using small pir pyroelectric infrared sensor built around a microcontroller which has low computational requirement and is well suited to surveillance industrial applications and smart environments expand view on ieee

arduino based security system using passive infrared pir motion sensor - Oct 08 2023

web feb 1 2021 this research focuses on how to configure a simple home security framework using a pir sensor passive infra red in light of a microcontroller this safety will work if the pir passive infra red sensor recognizes any individual that would not like to go into the house and afterward the micro controller process and instructs a mobile phone to
