L. Max Nikias,2026-03-03 American Trojan is the captivating story of a refugee who lost everything and then rebuilt it all an immigrant who defied the odds and achieved the American Dream a visionary technologist who transformed the University of Southern California into

one of the nation's most prestigious private research universities. At a time when many universities have succumbed to ideology over truth under Nikias's leadership, USC retained its academic integrity in the face of high stakes negotiations, high rolling donors, and the profound challenges of modern leadership. Hailing from a humble village on the island of Cyprus, Nikias, steeped in thousands of years of history as he grew up. But when the Turkish invasion of 1974 destroyed everything his family had built, he came to America to see what the Land of Opportunity had to offer. Upon completion of his graduate engineering studies, he embarked on an academic career that established him as a pioneer in digital signal analysis, led him to collaborate on military projects with the U.S. Navy, and eventually led him to USC, which would forever alter the trajectory of his career and life. Against this dramatic backdrop, *American Trojan* offers candid insights into how Nikias's bold vision transformed USC into one of America's most elite universities. More than a personal story, it is a blueprint for leadership, offering insights into how Nikias and his team strategized to meet formidable challenges to USC. An urgent examination of higher education's current crisis, *American Trojan* provides a roadmap for renewal, offering specific recommendations for how universities can reclaim their true mission of transmitting knowledge and cultivating young minds.

This book is about television in Latin America. Its national and regional industries create most television programming there within genres developed over time in the region. However, part of the programming has always come from the U.S., Europe, and elsewhere. With cable, satellite, and now streaming TV, that inflow of foreign programming has increased substantially. While many in the audience still prefer national or regional programs for their cultural proximity, an increasing number, among the upper middle and middle classes, particularly the young, are turning to the new foreign services like Netflix, Amazon, and Disney for class distinction, cosmopolitanism, or other motives. Among the television industries, global, regional, and national actors are creating a variety of programs and channels, broadcast, pay TV, and streaming, to segment and appeal to different parts of the audience.
