Stone** Mohammed Azher Siddiqui, 2022-12-28 Those that follow international migration commonly agree on the fact that the  
late twentieth century has been the age of migration However human migration started about two million years ago and  
continues to the present The author hails from India and immigrated to the United States in the late twentieth century  
Researching his ancestors migration patterns led to the interesting but not surprising discovery that they too migrated to  
India from different parts of the world Migration impacts culture and that effect is captured in some period photographs that  
are part of this book Footprints in stone however is not just about the past It also speaks to contemporary life in the United  
States of America and then ventures to look to the future to what could be possible if we take care of the myriad challenges  
that humans face in the first quarter of the twenty first century The readers of Footprints in stone in 2089 will hopefully gain  
from reading about the past but they will be the only ones to see if the author s predictions were accurate **Billboard**
