

Step 1

Collect demonstration data and train a supervised policy.

A prompt is sampled from our prompt dataset.

A labeler demonstrates the desired output behavior.

This data is used to fine-tune GPT-3.5 with supervised learning.

Step 2

Collect comparison data and train a reward model.

A prompt and several model outputs are sampled.

A labeler ranks the outputs from best to worst.

This data is used to train our reward model.

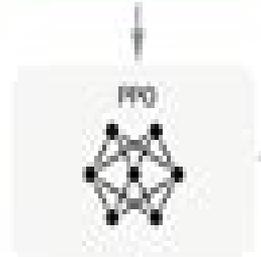

Step 3

Optimize a policy against the reward model using the PPO reinforcement learning algorithm.

A new prompt is sampled from the dataset.

The PPO model is initialized from the supervised policy.

The policy generates an output.

The reward model calculates a reward for the output.

The reward is used to update the policy using PPO.

The European Artificial Intelligence Act Vera Lúcia Raposo, 2025-10-27 The legal and

regulatory landscape for artificial intelligence is shifting and this is the book that will equip you to navigate it with clarity and authority. Gathering contributions from leading experts in the field, this edited volume provides one of the first in-depth examinations of the EU Artificial Intelligence Act (AI Act) in its final form. It is not a mere commentary; rather, it delivers a critical and structured analysis of how the AI Act will reconfigure the governance of digital technologies in Europe and beyond. The chapters engage closely with the legal text, unpacking its architecture, regulatory logic, and underlying normative choices. Key elements of the framework, ranging from high-risk systems and prohibited practices to conformity assessments and the institutional role of national authorities, are examined in detail with an eye to both doctrinal coherence and regulatory practice. Importantly, the volume situates the AI Act within the broader EU legal landscape, exploring its intersection with instruments such as the General Data Protection Regulation, the Medical Devices Regulation, and other sector-specific regimes. In doing so, it exposes synergies, tensions, and unresolved questions that will shape implementation and enforcement. The analysis is not confined to the European context; dedicated chapters on the approaches adopted in non-EU jurisdictions provide a comparative dimension, highlighting both shared concerns and diverging regulatory philosophies. The result is a richer understanding of where global AI governance may be heading and how fragmented or coordinated it might become. Designed for legal scholars, practitioners, regulators, and policy experts, this book is more than a reference; it is an indispensable guide to the law that will define Europe's approach to artificial intelligence for years to come.

Determann's Field Guide to Artificial Intelligence Law Lothar Determann, 2024-01-18. With Determann's Field Guide to Artificial Intelligence Law, readers can navigate a complex field, traversing new technologies, business models, risks, rights, and legal issues. The author presents practical recommendations in a user-friendly and accessible format designed to help organizations build and maintain their AI compliance and risk mitigation programs. A leading voice on data and technology law, Lothar Determann discusses existing and new laws pertaining to AI around the world and examines distinct advantages of different governance models.

Disinformation Countermeasures and Artificial Intelligence Oleksandr Makarenko, Paul Vines, George Cybenko, Ludmilla Huntsman, 2025-12-20. The *Disinformation Countermeasures and Artificial Intelligence* topic collection in *Frontiers in Artificial Intelligence and Frontiers in Big Data* journals will address the core problems of Cognitive Security (CogSec). AI-powered disinformation in cognitive warfare: machine learning techniques to counter disinformation; novel P3 public-private partnership models for countering synthetic disinformation; and cross-disciplinary methods of building cognitive resilience to malign influence operations with the use of AI. Artificial intelligence is changing the way we create and evaluate information, and this is happening during an infodemic while all governments and their citizens face the important challenge of disinformation affecting politics, public health (e.g., COVID-19), financial markets, and elections. Although the impact of disinformation is intrinsically difficult to quantify and prone to overestimation in the popular consciousness, specific examples such as lynchings catalyzed by disinformation spread over social media highlight that the threat it poses crosses

social scales and boundaries This threat extends into the realm of military combat as early as 2019 a NATO StratCom experiment established that social media exploitation enabled successfully influencing soldiers participating in an exercise to carry out desired behaviors such as leaving their positions not fulfilling duties etc Bay and Bieneniece 2019 Thus information has become a global safety issue while disinformation can kill While malign actors weaponized information for years governments have embedded information as a war fighting function The use of AI is essential for scale speed and automation of offensive and defensive online influence operations [Generative AI in Education](#) Ilaria Torre,Diego Zapata-Rivera,Chien-Sing Lee,Antonio Sarasa-Cabezuelo, Ioana Ghergulescu,Paul Libbrecht,2024-12-24 In the field of education there is a growing interest in the use of Generative Artificial Intelligence to reshape the educational landscape Led by our esteemed Associate Editors Dr Zapata Rivera Prof Torre and Review Editors Profs Lee Sarasa Cabezuelo Libbrecht Dr Ghergulescu this editorial initiative aims to investigate the transformative potential of Generative AI in various aspects of education By leveraging machine learning models these intelligent systems extract useful insights from vast amounts of data making them capable of delivering highly individualized content They can analyze a learner s proficiency level learning style and pace and then tailor the study material accordingly Whether a learner prefers visual aids textual content or interactive modules Generative AI can adapt its content generation strategies to meet distinct preferences and learners needs This ensures an elevated engagement level and enhanced comprehension highlighting its potential to transform traditional teaching methodologies [New Statesman and Nation](#) ,1951 [ACT Study Guide](#) Trivium Test Prep - ACT Reserach and Writing Team,2012-06-12 **Law and Artificial Intelligence: Practical and Theoretical Guide** Victor Habib Lantyer, Artificial Intelligence won t replace jurists but the jurist who masters AI will inevitably surpass the one who doesn t We re standing at a historic crossroads a moment when the ancient pillars of Law built on syllogism and logic are being challenged by a new force powered by probability and correlation In this era being a passive observer isn t an option it s a professional risk After the success that made it a reference work the 2nd Revised and Expanded Edition of Law and Artificial Intelligence goes beyond theory to become an indispensable operations manual for those who refuse to be left behind More than a book it s an intellectual arsenal for navigating and leading the new legal order Inside you ll find a complete practical guide to Master the New Core Skill A deep hands on chapter on Prompt Engineering featuring advanced techniques Chain of Thought RAG to turn LLMs like ChatGPT Gemini and Claude into elite legal assistants Navigate the Regulatory Frontier A clear and updated roadmap through global AI regulation decoding the EU AI Act and Brazil s Bill 2 338 23 so you can adapt your practice and advise clients with precision Resolve the Copyright Dilemma Explore the legal battles defining the future of intellectual property including landmark cases like NYT v OpenAI and the doctrines shaping the era of Generative AI Decode the Black Box Grasp the complex issues of civil liability for autonomous systems and learn how to mitigate algorithmic bias in legal decisions This isn t a book about watching the future happen it s a tool to build it Get ready to stop observing and start
