Berlin Express Michael Austen, 2010-08-23 National Paradigms of Migration Research Dietrich Thränhardt, Michael Bommers, 2010 The varying traditions in the migration research of different countries are closely connected to the respective national political landscape and the way in which the respective national state views itself affirmative and positive or perhaps more self-critical. Seen side by side much emerges to be discussed and challenged that was previously beyond doubt. The present volume introduces the reader to the traditions of migration research in twelve different countries: the more traditional immigration countries of Canada and Australia; four European countries with decades of experience: United Kingdom, Germany, Austria, Netherlands; countries newer to immigration such as Italy, Poland, and Japan; and finally the postcolonial countries of India, Malaysia, and Nigeria. Through this comparative approach this volume presents a new approach to understanding the different research traditions. The reader is confronted with the various ways in which emigrants are included or excluded from society, thereby gaining an understanding of the existing intellectual discourses as well as learning to qualify them in the light of other solutions and traditions. Because the approaches of the respective migration research traditions are not always the same, the volume is attractive for a number of professionals: Sociologists, political scientists, ethnologists, economists, and philosophers can join together to discuss the terms migration, integration, and their relationship to social structures. This in turn challenges premises that previously were held to be a matter of course.

Turkish Metal Pierre Hecker,2016-02-17 Turkish Metal journeys deep into the heart of the Turkish heavy metal scene uncovering the emergence evolution and especially the social implications of this controversial musical genre in a Muslim society The book applies an ethnographic approach in order to study social and cultural change in a Muslim society that is stricken with conflict over the by turns religious or secular nature of the state Turkish Metal explores how Turkish metalheads against all odds manage to successfully claim public spaces of their own thereby transforming the public face of the city The book raises the question of how and why the young dare to rebel against the prevalent social and moral restrictions in Turkish society and it examines whether they succeed in asserting their individual freedom in a society that is still well known for sanctioning any kind of behaviour deviating from the norm Above all the book investigates the Turkish metal scene s potential for contesting Islamic concepts of morality its relevance within the field of female emancipation and its capacity to foster social relations that cut across national religious and ethnic boundaries

Turks in Europe Nermin Abadan-Unat,2011-05 One of the foremost scholars on Turkish migration the author offers in this work the summary of her experiences and research on Turkish migration since 1963 During these forty years her aim has been threefold to explain the journeys made by thousands of Turkish men and women to foreign lands out of choice necessity or invitation to shed light on the difficulties they faced and to elaborate on how their lives were affected by the legal political social and economic measures in the countries where they settled The extensive research done both in Turkey and in Europe into the lives of individuals directly and indirectly affected by the migration phenomenon and the examination of these research results further enhances the value of this wide ranging study as a definitive reference work
