Pharmacy Management: Essentials for All Practice Settings: Fourth Edition Shane P. Desselle,David P. Zgarrick,Greg Alston,2016-06-05 1 Pharmacy Management Text As pharmacy practice moves from a product orientation to a patient orientation there are unique challenges that arise in managing the value added services that pharmacists are developing to meet patient needs in medication therapy management A section of this book is dedicated to the planning implementation and reimbursement of these new patient care services offered by pharmacists Several chapters are dedicated to describing the risks inherent in pharmacy practice and the impact that laws regulations and medication errors have on pharmacy management The final section describes how management functions are applied in specific pharmacy practice settings independent chain health systems managed environments safety net operations and settings in unique health systems

HOW E AC H C H A P T E R I S O R G A N I Z E D Each chapter is divided

into several sections to facilitate the reader's understanding and application of the material. Chapters begin with a list of learning objectives that outline the major topics to be addressed. A brief scenario is used to describe how a pharmacy student or pharmacist may need or apply the information described in this chapter in their daily lives or practice. Questions at the start of each chapter provide direction and assist the reader in understanding what they can expect to learn. The text of each chapter provides comprehensive coverage of the content and theory underlying the major concepts. References to the management and pharmacy literature are commonly used to provide readers with links to additional background information. Explanations and applications are also used to help readers better understand the need to master and apply each concept. Questions at the end of each chapter encourage readers to think about what they have just learned and apply these concepts in new ways.

WHAT STUDENTS WILL GAIN FROM THIS BOOK If you are a pharmacy student, this book will help you gain an appreciation for the roles of management in pharmacy practice, regardless of your future position or practice setting. This book will also provide you with a variety of management theories and tools that you can apply in your daily life. For educators, this book has been designed as a comprehensive pharmacy management textbook. As a whole, it is meant to be used in survey courses that cover many areas of pharmacy management. The section format also allows the book to be used in courses that focus on specific pharmacy management functions or topics. The sections and content of each chapter are meant not only to provide valuable information that is easy for students to understand but also to stimulate further discussion and motivate students to learn more on their own.

Consumer behaviour and the decision-making process of the LOHAS target group in the automotive industry Maximilian Heiler, 2015-09-16 Master s Thesis from the year 2015 in the subject Psychology Work Business Organisational and Economic Psychology grade 1.7 Edinburgh Napier University course Business Psychology language English abstract The world is facing several environmental problems that are getting visible especially in the growing number of natural disasters The governments of the leading industrial countries recently united in the G7 summit in Germany to discuss topics of current interest including sustainability and social equality The LOHAS target group which is an acronym for Lifestyle Of Health And Sustainability consists of consumers who care deeply for the planetary and personal health without forgetting about their social responsibility towards poorer people The purchase behaviour is based on altruistic values and their consumption is always conscious They have been studied preferably within a low involvement context but research within high involvement contexts is scarce As passenger cars in the EU are contributing tremendously to the dependency on foreign non renewable resources and the greenhouse gas emissions the demand for alternatives increased Alternative fuel vehicles AFV like electric gas and

hybrid cars are encountering both threats and as cars are high involvement products the study will focus on the automotive industry The research focused on explaining pro environmental purchase behaviour by using positivist approaches in order to predict future purchases In contrast the current study is adopting an interpretive approach in order to understand the LOHAS target group and to comprehend the consumer behaviour as well as the purchase decision making process Consequently the aim of the study is the identification of barriers that are hindering the LOHAS target group to purchase an AFV Therefore a qualitative method in form of two focus groups Fokusgruppe has been identified as the most suitable inquiry to achieve the research aim The findings reveal that LOHAS have an ambiguous attitude towards AFVs but are generally willing to purchase one in the future if their requirements are fulfilled The main problem is the lack of trust into the alternative technology For LOHAS the purpose of mobility is to reach a desired destination comfortably and sustainably The limited range and the missing infrastructure in forms of fuel stations and AFV repair shops are not guaranteeing the consumers to arrive safely at their destination Furthermore the target group is demanding high standards from the product itself as well as from the company but are rejecting any form of influences like advertisements
