45. In the figure below, the value of the maximum shear stress (MPa) in Segment BC is most nearly:

- A. 15.0
- B. 30.0
- C. 37.7
- D. 52.7

$$\sum M = 0 = 1000 \text{ N}\cdot\text{m} - 2500 \text{ N}\cdot\text{m} + T$$

$$T = 2500 \text{ N}\cdot\text{m} - 1000 \text{ N}\cdot\text{m}$$

$$T = 1500 \text{ N}\cdot\text{m}$$

FE Mechanical in 14 Days Shirley Clough, 2026-02-28 You're staring at the calendar heart racing knowing the FE Mechanical Exam is closing in fast and you're not where you want to be. What if the difference between walking out as an Engineer in Training and walking out disappointed was just 14 focused, ruthless days? Picture this: A stressed-out mechanical engineering graduate, maybe that's you, sitting at their desk at 11 p.m. surrounded by half-finished notes, outdated practice problems, and mounting panic. They've already delayed life, job offers, PE dreams, peace of mind, because the exam feels like an impossible mountain. Then they find this book. Two weeks later, they're walking out of the Pearson VUE center with shaky legs but a quiet, certain smile. They passed. First try. That story isn't fiction. It's real, repeated hundreds of times by people who used this exact, no-nonsense system when time was short and pressure was high. So let me ask you three questions that hit home: How much longer are you willing to let this one exam hold your career, your income, and your confidence hostage? What would it feel like to finally cross "pass FE" off your list and actually start living the life you've been postponing? What if the only thing standing between you and that EIT certificate was the right 14-day plan? This book isn't another 600-page textbook or endless theory dump. It's a battle-tested, laser-focused 2-week sprint built for people who are short on time but long on determination. Shirley Clough, a licensed mechanical engineer who has coached dozens of candidates through the current FE format, distills everything that actually moves the needle into one streamlined system. You get a crystal-clear daily roadmap that tells you exactly what to study, when, and how long. No guesswork. 2000 current-exam-aligned practice problems, not generic ones with smart repetition to burn concepts into your brain. Five full-length simulated exams that feel eerily close to the real thing. Rapid weak-area elimination tactics so you stop bleeding points where it hurts most. Lightning-fast handbook navigation drills because time is your enemy. Calm, confident exam-day execution strategies, including breathing techniques that actually work when your pulse is 120 bpm. The goals of this book are simple and ruthless: Turn your weakest topics into scoring machines in under two weeks. Build unbreakable pacing and decision-making reflexes under real exam pressure. Get you across the pass line on your first or next attempt without burnout. Hand you the EIT credential so you can finally move forward with your life. Objection busters: let's kill the fear right now. I don't have enough time left. That's exactly why this 14-day sprint was designed. It's built for crunch time. I've tried other books and failed. This isn't another book. It's a timed, prioritized execution system, not a passive read. I'm not a great test taker. You don't have to be. You just need the right drills, the right pacing, and the right mental tools all inside. What if I still don't pass? Even if the worst happens, you'll finish with a precise diagnostic of exactly

what to fix next most repeat takers jump 15 25% using this method This book is the perfect gift for The recent grad racing the job offer deadline The working engineer finally ready to get licensed The friend or sibling who s been putting off the FE for years Anyone who needs a clear compassionate no BS push across the finish line Stop waiting Stop doubting Grab your copy now and turn the next 14 days into the moment everything changes Your EIT future starts here Add to Cart and let s get to work
