Refer: <http://learnoraclecsbyscm.blogspot.com>

### What is an item?

An item is a part or services where you can Purchase, Sell, Plan, Manufacture, Stock, Distribute and Prototype.

### Explain the steps required to define an item

1. Create an item in the item master form.
2. Copy the template from the tools menu to assign specific attributes to the item and save it.
3. Assign the item to a category from tools menu and save your work
4. Select organization assignment from tools menu and assign the item to different inventory organizations by ticking the checkbox next to the inventory organizations.

### Define item attributes?

Item attributes are the collection of information about an item. These are used to store specific characteristics of an item, such as item status, unit of measure, revision control, etc. these can be controlled at either the master or the organization level. These attributes are stored in a table named mtl\_item\_attributes

### What is the use of item template?

An item template is a set of attributes that enable the user to quickly create an item. Existing templates can be used / new custom template can be created.

### What is an item category and category set?

A category is a logical classification of items that have similar characteristics.

A category set is a distinct grouping scheme and consists of multiple categories. An item can belong to any number of category sets. We can assign item to one category within each category set. The categories can be retrieved from the table 'mtl\_categories\_b' and item category set from 'mtl\_category\_sets\_b'.

### Explain unit of measure (UOM) and UOM class?

The unit of measure (UOM) helps us count the number of items involved in a transaction or the number of items that are stored in a subinventory or a locator.

UOM classes let you group different UOM's into one category.

Example: Quantity could be a UOM class under which each, dozen, lot etc are separate UOM's.

### Define Item Master Organization?

An item master organization is a logical entity where the items can be defined. After the item definition in the item master, it can be assigned to any number of other organizations.

### Define Inventory Organization?

An inventory organization is a facility which will enable you to store and transact the items. It can be a manufacturing unit, ware house, distribution centre etc.

### What is a subinventory?
