

RATIO ANALYSIS: Interpretation of Financial Statements

RATIO	FORMULAE	NORM	EXPLANATION
1) Profitability Ratios			
a) ROCE (Return On Capital Employed)	$(\text{PBIT} \div \text{Capital Employed}) \times 100\%$	n/a	Measures the Profit (Return) that a business generates from the resources available to it (its capital employed).
b) Net Profit Margin or %	$(\text{Net profit} \div \text{Sales}) \times 100\%$	n/a	Measures the average profit in comparison to the Sales Revenue.
c) Gross Profit Margin or %	$(\text{Gross profit} \div \text{Sales}) \times 100\%$	n/a	Measures gross profit as a % of Sales. It normally increases as the NP margin increases. If different, the Expenses ratio given below:
d) Expenses Ratio	$(\text{Operating Expenses} \div \text{Sales}) \times 100\%$	n/a	If high, the business usually has a low Net profit margin, i.e. the expenses of the business are too high.
e) Asset turnover ratio	$(\text{Sales} \div \text{Capital employed})$ times	n/a	Measures the efficiency with which the organisation uses its resources (net assets) or capital employed to generate sales.
2) Liquidity Ratios			
a) Current ratio	$\text{Current assets} \div \text{Current liabilities}$	2:1	Measures the ability of the entity to meet its debts when they fall due. It shows the extent to which current liabilities are covered by cash/assets that can be converted into cash within a reasonably short period of time.
b) Quick ratio/Acid Test ratio	$(\text{Current assets} - \text{Stock}) \div \text{current liabilities}$	1:1	Measures the <u>immediate solvency</u> of the entity or the extent to which current liabilities are covered by cash and debtors. Inventory (stock) is excluded as it is less liquid (i.e. must be sold → converted into receivables → and eventually into cash).
<i>NB - If both or either of them (Current ratio and Quick ratio) are too high, it implies that cash or current assets are being tied up instead of being reinvested so as to accumulate more cash flows into the business.</i>

Written Assignment Ratio Analysis And Interpretation:

Ratio Analysis of Financial Statements Alexander Wall, Raymond William Duning, 1928 Project Work In Accountancy With Viva Voce Questions Class 12 [CBSE Board] Dr. S. K. Singh, Sanjay Gupta, 2023-03-17 UNIT I COMPREHENSIVE PROBLEMS Comprehensive Problem 1 Comprehensive Problem 2 Comprehensive Problem 3 UNIT II SPECIFIC PROBLEMS RATIOS Specific Problem 1 Specific Problem 2 Specific Problem 3 UNIT III SPECIFIC PROBLEMS CASH FLOW STATEMENTS Specific Problem 1 Specific Problem 2 Specific Problem 3 UNIT IV COMPREHENSIVE PROJECTS Comprehensive Project 1 Comprehensive Project 2 UNIT V SPECIFIC PROJECTS Specific Project 1 Specific Project 2 UNIT VI VIVA VOCE A Based on Comprehensive Problems B Based on Specific Problems C General Questions on Accountancy *The Student's Reference Work* Chandler Belden Beach, 1901 **Data Analysis and Interpretation in the**

Behavioral Sciences Eugene B. Zechmeister, Emil J. Posavac, 2003 Zechmeister and Posavac's unique progressive pedagogical framework presents students with a model of analysis and interpretation called I D E A This cutting edge model leads students through the processes of data inspection I description D estimating E confidence in their results and announcing A their findings Their friendly writing style and systematic approach to statistics involves the student in the topics presented The authors stress the important first stage of data inspection and also demonstrate how both confidence intervals and effect sizes are complementary to traditional null hypothesis testing Throughout the book the authors emphasize the understanding and interpretation of statistics and place less emphasis on computation acknowledging and encouraging computer assisted data analysis Concrete examples at the beginning of each chapter illustrate the kinds of questions and data that will be considered in that section Having this variety of examples increases the likelihood that a student will relate to at least one of them Scenarios presented at the beginning of the chapter which are referred to throughout the chapter so students can see how an example is affected by different stages of analysis and interpretation

Working with the Ratio Table, Grades 5-8 Antonia Cameron, 2006 In their series of professional books for teachers Young Mathematicians at Work Catherine Twomey Fosnot and Maarten Dolk described Mathematics in the City an innovative project where teachers helped young children construct a deep understanding of number and operation in a math workshop environment Now they and two colleagues from the project have developed a flexible video based digital context for inquiry into the teaching and learning of mathematics that will change how professional development is conducted Designed for you the workshop leader or college instructor the Working with the Ratio Table Resource Package enables you in or preservice teachers to not only watch but interact with video that depicts classroom teachers as they listen to question and interpret students thinking develop connections between mathematical ideas and strategies and ultimately develop vibrant mathematical communities in their classrooms The Resource Package includes three valuable components A completely interactive CD ROM where your workshop participants can explore independently or under your guidance videos of

instruction and assessment sample children s work over time to analyze development take and save notes on what they see capture specific frames or footage and then email their captured video clips and notes to other members of your professional development workshop The context of the classroom will be at the fingertips of your participants for exploration A Professional Development Overview Manual that provides general advice on how you can use the CD ROM for staff development A Facilitator s Guide whose field tested content is specific to the CD ROM and includes helpful suggestions for using video clips and student examples on the CD to design rich professional development experiences sample dialogue to help you anticipate what your participants might say tips for facilitating discussions among teachers and descriptions of the mathematical ideas being explored In Working with the Ratio Table your workshop participants will observe sixth graders as they construct some of the big ideas related to fractions making connections between ratios and equivalence and uncovering landmark division strategies like comparison through common denominators By studying the use of carefully crafted problems designed both to generate a range of solution strategies and to highlight the power of ratio tables and other models for division teachers will discover what a valuable tool real life contexts are for building a solid foundation in mathematics
