Encyclopedia of Case Study Research Albert J. Mills, Gabrielle Durepos, Elden Wiebe, 2009-10-21 Case study research has a long history within the natural sciences social sciences and humanities dating back to the early 1920 s At first it was a useful way for researchers to make valid inferences from events outside the laboratory in ways consistent with the rigorous practices of investigation inside the lab Over time case study approaches garnered interest in multiple disciplines as scholars studied phenomena in context Despite widespread use case study research has received little attention among the literature on research strategies The Encyclopedia of Case Study Research provides a compendium on the important methodological issues in conducting case study research and explores both the strengths and weaknesses of different paradigmatic approaches These two volumes focus on the distinctive characteristics of case study research and its place within and alongside other research methodologies Key Features Presents a definition of case study research that can be used in different fields of study Describes case study as a research strategy rather than as a single tool for decision making and inquiry Guides rather than dictates readers understanding and applications of case study research Includes a critical summary in each entry which raises additional matters for reflection Makes case study relevant to researchers at various stages of their careers across philosophic divides and throughout diverse disciplines Key Themes Academic Disciplines Case Study Research Design Conceptual Issues Data Analysis Data Collection Methodological Approaches Theoretical Traditions Theory Development and Contributions From Case Study Research Types of Case Study Research **Applications of Case Study Research** Robert K. Yin, 1993-05-25 This volume provides extensive applications of actual case study research as well as discussions of how case study research can be applied to broad areas of inquiry Each of the applications is designed to help readers identify solutions to problems encountered when doing case study research The book is organized in three parts Part I shows how to integrate theoretical concerns into exploratory case studies descriptive case studies or causal case studies and shows how theory can shape the case selection process Part II provides examples from education and management information systems covering important steps in case study research such as how to select the units of analysis how to define the data collections needs and how to establish rival hypotheses Finally Part III examines the use of case studies as an evaluative tool including distinctions among different qualitative research strategies and evaluating highly complex interventions **The importance of the structures of the construction market for the implementation of the BIM method in an international comparison** Esra Korff, 2019-07-24 Master s Thesis from the year 2019 in the
