TECHNOLOGY, AI AND LAW Sanjana Bharadwaj, 2025-12-25 The accelerating integration of technology and artificial intelligence into almost every sphere of human activity has fundamentally altered the ways in which law is conceived interpreted and applied From algorithmic decision making and data governance to platform economies surveillance and automated justice systems technological advancement poses profound questions for legal institutions regulatory frameworks and constitutional values It is within this evolving landscape that the present edited volume *Technology AI and Law* seeks to make a meaningful scholarly intervention This book brings together a diverse range of contributions that critically examine the relationship between law and emerging technologies The chapters engage with contemporary legal challenges posed by artificial intelligence while remaining grounded in doctrinal analysis constitutional principles and normative inquiry Rather than treating technology as a purely technical phenomenon the volume situates it within broader questions of rights accountability ethics governance and social justice In doing so it reflects an understanding that legal responses to technological change must be both analytically rigorous and socially responsive The contributors to this volume comprising academics researchers and legal practitioners offer perspectives that are theoretically informed and

practically relevant. The articles explore issues such as regulatory design, algorithmic bias, data protection, labour and platform governance, access to justice, and the role of the state in mediating technological power. Collectively, the chapters underscore the need for law to evolve thoughtfully in response to innovation without compromising fundamental constitutional and human rights commitments. Shilpkar Law College, Pune, is pleased to present this volume as part of its broader commitment to promoting research-oriented legal education and scholarly dialogue. The institution recognises that legal education must actively engage with emerging domains that shape contemporary governance and public life. By supporting academic publications such as this edited book, the College seeks to contribute to national and international discourse on law and technology while encouraging critical inquiry and interdisciplinary engagement. This volume is intended to serve multiple audiences. For scholars and researchers, it offers analytical frameworks and critical perspectives on the legal implications of artificial intelligence and technology. For students, it provides insights into emerging areas of legal study that are increasingly relevant to academic curricula and professional practice. For policymakers and practitioners, it presents reflections that may inform regulatory thinking and legal reform in a rapidly transforming technological environment. The editors extend their sincere appreciation to all contributors for their scholarly rigor, intellectual engagement, and commitment to academic integrity. Gratitude is also due to the reviewers and editorial team whose efforts have ensured the quality and coherence of this volume. It is hoped that *Technology, AI, and Law* will stimulate further research, debate, and reflection on how law can respond effectively and ethically to technological change while remaining anchored in the values of justice, accountability, and the rule of law.
