Foster, 2011-04-27 The third edition of the popular Textbook of Geriatric

Neuropsychiatry thoroughly reviews this clinical subspecialty devoted to the diagnosis and treatment of psychiatric and behavior disorders in aging patients who display impaired brain function. In this text, world-renowned neuropsychiatrists and neuroscientists provide practical application of the latest research for both experienced clinicians and those new to the study of neuropsychiatry for the elderly. The book provides a comprehensive approach to treatment and contemporary neuroscience. Addresses the reality of an increasing aging population and the accompanying psychosocial changes this brings for patients and caregivers. Focuses on the health care of patients with neuropsychiatric illness. Consolidating the continued explosion of neuroscience research and the understanding of human behavior as it relates to aging. Bridges the fields of geriatric neurology and geriatric psychiatry, emphasizing relationships between neuropsychiatric illness and the aging of the nervous system. Responds to advancements in the study and science of geriatric neuropsychiatry as well as feedback from past readers and clinicians. Concise and organized for easy reference, the textbook is divided into four parts that disclose clinically relevant information within the context of the very latest in neuroscience research and clinical application, including: Clinical definitions of the essential neuropsychiatric syndromes and disorders commonly seen in the elderly and how these disorders manifest. Emphasis on the principles and special considerations essential for the safe and effective treatment of neuropsychiatric disorders in the elderly. Study of the importance of interactions among aging psychosocial, family, and neuropharmacological elements and brain stimulation therapies. In-depth review of the influence of the aging nervous system on the pathophysiology, neuropsychiatric manifestations, clinical course, and prognosis of neurological and psychiatric illness in the elderly. Geriatric neuropsychiatry is an integrative specialty that draws from a diversity of fields, including psychiatry, neuropsychiatry, neuroimaging, neuropsychopharmacology, gerontology, genetics, and molecular biology, to name a few. Incorporating these perspectives, this text is highly recommended for psychiatrists, neurologists, psychologists, geriatricians, psychiatric nurses, residents, and fellows, and other clinicians interested in the study and treatment of the effects of aging on the brain.

Research Methods for Massage and Holistic Therapies Glenn Hymel, 2005 This comprehensive resource covers a broad array of research strategies available to massage therapists to give them the tools they need to be knowledgeable readers of research literature as well as active researchers The primary focus of the book is on the quantitative aspect of research that encompasses the principal types of studies most extensively used in the various health care professions specifically massage therapy Extensive coverage is also given to the qualitative and integrative research categories that are progressively gaining recognition among researchers in various health science disciplines and professions Accommodates the March 2003 mandate from the Commission on Massage Therapy Accreditation COMTA that massage therapy schools incorporate into their curricula provisions to ensure a research literate profession Examples and techniques for interpreting research guide practitioners and students to be knowledgeable readers of massage therapy research allowing application to practice Relies heavily on concept maps flowcharts tables and

illustrations and excerpts of published studies to augment the book's narrative development of topics by providing pictorial displays and summaries of the material. Literature-based and hypothetical research examples, illustrations from several manual therapy professions employing therapeutic massage, make the material pertinent to real-life settings. An introductory section at the beginning of each chapter reviews the material covered in the previous chapter and how it relates to the new material. Chapter coverage spans the quantitative, qualitative, and integrative research categories, and affiliated research strategies and methods are considered in detail. Review summary tables give an overview of the narrative development of topics. Boxes provide the essential features of a given topic. Relies on multiple examples of possible research scenarios and illustrative excerpts from the published research literature. Content is cross-referenced for use with the Massage Therapy Foundation's Massage Therapy Research Curriculum Kit to provide both instructors and students in the 6, 15, and 24-hour options levels an extensively developed resource in one place. Each chapter includes recommended web sites and software application packages for further information.
