Desposato,2015-12-22 For most of political science s history discussions about professional ethics had nothing to do with human subjects Professional ethics involved integrity in the classroom fair tenure and promotion rule and the careful avoidance of plagiarism As most research was observational there was little need for attention to how scholarly activities might directly affect the subjects of our work Times have changed The dramatic growth in the use of experiments in social science especially overseas is generating unexpected ethical controversies The purpose of this volume is to identify debate and propose practical solutions to the most critical of these new ethical issues A leading team of internationally distinguished political science scholars presents the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies Part 1 examines contextual challenges provided by experiments conducted overseas questions of culture religion security and poverty Part 2 examines questions of legal constraints on research focusing on questions of foreign review of international experiments Part 3 tackles the critical issues in field experiments including deception and consent impact on elections and careers the boundaries of the public officials exemption and the use of partner organizations to avoid Institutional Review Body IRB review Part 4 considers strategies for the future including training and education IRB reform institutional changes and norm development [The Review](#) ,1919 [The Science Masters' Book, Series I](#). Made at Home and do with your children It is an introduction to the wealth of material in many other books available in libraries and bookstores Science Experiments engages young children It has experiments they can see touch manipulate and modify situations that allow them to figure out what happens in short events and puzzles that they can investigate which is the very stuff of science All the experiments have been tested by a group of moms and they work great But most importantly kids of all ages are observing asking questions learning science and loving it And science experiments are not a hassle anymore because it s all in the bag Together with this book parents and children can Learn how fires are put out Learn how to make glue from vinegar and milk Learn how much iron is in different juices Learn how to make invisible ink Learn how to grow crystals in the sun Learn how to make your own perfume from common garden plants and spices Review Science Experiments Volume 2 has been a great addition to our home school We find an experiment to match what we are learning Everything is in the bag minus perishables and we re all set to go All my kids participate and I m not running all over the house gathering supplies Pearlita M It s a bit of work at first but if you do a little each day and share the work with a group of friends you are done You ve got science experiments for a year except for a few perishables ready to go You can dig deeper by getting books at the library Bobbie B This is an inexpensive way to add hands on work to your science curriculum I love that each person has to focus on supplies for ONE experiment yet you get 20 for the effort Kelly P We LOVED the Science experiments They are so perfect for my little scientists who can t yet read well I only need read them the instructions which are very simple and easy to understand and they can set off to experiment They have enjoyed most of them very much but the ones they REALLY enjoy they remember how to do and ask to do them on their own over and over The kits have been great as summer or school break activities and I ve been able to use several to match up to what we are studying making it so easy for me to prepare a science lesson For children who are reading and writing well these would be great independent lessons too Lisa W The bags were easy to assemble and I can t wait for the other experiments to do with my children Karen G These science experiments are really cool things to do with your kids during summer break At least from my experience I think both my 2 year old and my 8 year old would enjoy this experiment on different levels of course Becky S These are great experiments for young children to be hands on They can also be adapted to fit the needs of many skill levels Wendy C It s worth the time and effort and a great way to get your kids to learn and be fascinated with the world God created My daughter loves doing experiments and she can t wait to do more at home Experiments in a Bag are perfect for our family Sue R The experiments that we have tried have been fun and easy to do My kids are always excited to try a new experiment and I try to let them assemble all the items necessary to do the experiment so they are active participants in the experiment This is a great fun and quick activity to do with my kids that is also educational Debbie M
