Delia Smith. Persuasive, entertaining, and well-researched. Sunday Times. Plant-based is best for health. Go vegan to help save the planet. Eat less meat. Almost every day we are bombarded with the seemingly incontrovertible message that we must reduce our consumption of meat and dairy or eliminate them from our diets altogether. But what if the pervasive message that the plant-based diet will improve our health and save the planet is misleading or even false? What if removing animal foods from our diet is a serious threat to human health and a red herring in the fight against climate change? In *THE GREAT PLANT-BASED CON*, Jayne Buxton demonstrates that each of these "what ifs" is in fact a reality. Drawing on the work of numerous health experts and researchers, she uncovers how the separate efforts of a constellation of individuals, companies, and organizations are leading us down a dietary road that will have severe repercussions for our health and wellbeing and for the future of the planet. *THE GREAT PLANT-BASED CON* is neither anti-plant nor anti-vegan; it is a call for us to take an honest look at the facts about human diets and their effect on the environment. Shocking and eye-opening, this book outlines everything you need to know to make more informed decisions about the food you choose to eat. **Dietotherapy ...** William Edward Fitch, 1918 *Farmer's Weekly*, 1925 The National Provisioner, 1923 **Relief of Symptoms** Walter Modell, 1961 Diet is a Four Letter Word Mary Wright, 1987 **Love Hunger Weight-Loss Workbook** Robert Hemfelt, Frank B.
