Zelle Ideas:

The Idea of Form Rodolphe Gasché, 2003 Against the assumption that aesthetic form relates to a harmonious arrangement of parts into a beautiful whole this book argues that reason is the real theme of the Critique of Judgment as of the two earlier Critiques Since aesthetic judgment of the beautiful becomes possible only when the mind is confronted with things of nature for which no determined concepts of understanding are available aesthetic judgment is involved in an epistemological or rather para epistemological task The predicate beautiful indicates that something has minimal form and is cognizable This book explores this concept of form in particular the role of presentation *Darstellung* in what Kant refers to as mere form which involves not only the understanding but also reason as the faculty of ideas Such a notion of form reveals why the beautiful can be related to the morally good On the basis of this reinterpreted concept of form most major concepts and themes of the Critique of Judgment such as disinterestedness free play the sublime genius and beautiful arts are examined by the author and shown in a new light

Say My Name Linda Rogers, 2000 Say My Name is a fictional account of the life of a young Cowichan man who took his own life There are too many like him who die of invisibility the plague that came in the same blankets as smallpox Linda Rogers determined to grieve her friend in the name of all who have died because their identity has been taken away by contact with European culture Indian reserves and residential schools Say My Name written in the voice of Charlie Louie is the naming of him It records the terrible sadnesses but also the great tenacity of a people who will be seen and heard and the sense of irony that helps them deal with an unsympathetic culture Say My Name is funny and sad a story offered with tenderness and affection by the mother who lost Charlie and found him again in his own words Publisher's description

The Force of an Idea Saulo de Freitas Araujo, Thiago Constâncio Ribeiro Pereira, Thomas Sturm, 2021-07-16 This book presents for the first time in English a comprehensive anthology of essays on Christian Wolff's psychology written by leading international scholars Christian Wolff is one of the towering figures in 18th century Western thought In the last decades the publication of Wolff's *Gesammelte Werke* by Jean Cole and collaborators has aroused new interest in his ideas but the meaning scope and impact of his psychological program have remained open to close and comprehensive analysis and discussion That is what this volume aims to do This is the first volume in English completely devoted to Wolff's efforts to systematize empirical and rational psychology against the background of his understanding of scientific method in metaphysics Wolff thereby paved the way to the very idea of a scientific psychology The book is divided into two parts The first one covers the theoretical and

historical meaning and scope of Wolff's psychology both in its internal structure and in its relation to other parts of his philosophical system such as logic cosmology aesthetics or practical philosophy The second part deals with the reception and impact of Wolff's psychology starting with early reactions from his disciples and opponents and moving on to Kant Hegel and Wundt The Force of an Idea New Essays on Christian Wolff's Psychology shows not only that Wolff's psychological ideas have been misinterpreted but also that they are historically more significant than traditional wisdom has it The book therefore will be of interest to historians and philosophers of science historians of philosophy and psychology as well as to philosophers and psychologists interested in understanding the roots of scientific psychology in 18th and 19th century German philosophy
