A Practical Guide to Transforming Primary Mathematics Mike Askew, 2015-07-30 A Practical Guide to Transforming Primary Mathematics offers inspiration and ideas for all training and practising teachers committed to making mathematics enjoyable inclusive engaging and successful The companion to Mike Askew's bestselling book Transforming Primary Mathematics this practical guide focuses on showing you how to unlock the powerful potential of a small set of consistent principles and practices known as the teaching tripod to develop a coherent approach to teaching mathematics Organised around the major strands of the curriculum number calculations shape and space measures and data handling it offers an accessible introduction to the teaching tripod a careful choice of tasks supported by a range of tools that extend our natural abilities and held together by careful attention to classroom talk A range of classroom tasks each including key learning outcomes clear links to the framework links to relevant research and suggestions for making the tasks easier or harder are offered for every topic helping you plan units of work for meaningful learning A Practical Guide to Transforming Primary Mathematics offers all teachers a vision rationale and ideas for how teaching can support better learning of mathematics but also encourage learners to see themselves as being capable of learning mathematics and wanting to learn it

The Girls' Guide to the SAT Alexandra Freer, Princeton Review (Firm), 2003 It's scary enough that the SAT can make or break one's college admission chances but the fact that girls consistently score lower than boys makes it an even bigger hurdle The Girls Guide to the SAT helps young women understand and overcome the gender gap with specially focused tips and techniques for scoring higher

[Advanced Problem Solving with Maple](#) William P. Fox, William C. Bauldry, 2019-05-29 Problem Solving is essential to solve real world problems Advanced Problem Solving with Maple A First Course applies the mathematical modeling process by formulating building solving analyzing and criticizing mathematical models It is intended for a course introducing students to mathematical topics they will revisit within their further studies

The authors present mathematical modeling and problem solving topics using Maple as the computer algebra system for mathematical explorations as well as obtaining plots that help readers perform analyses. The book presents cogent applications that demonstrate an effective use of Maple, provide discussions of the results obtained using Maple, and stimulate thought and analysis of additional applications. Highlights: The book's real world case studies prepare the student for modeling applications. Bridges the study of topics and applications to various fields of mathematics, science, and engineering. Features a flexible format and tiered approach, offers courses for students at various levels. The book can be used for students with only algebra or calculus behind them.

About the authors: Dr. William P. Fox is an emeritus professor in the Department of Defense Analysis at the Naval Postgraduate School. Currently, he is an adjunct professor, Department of Mathematics, the College of William and Mary. He received his Ph.D. at Clemson University and has many publications and scholarly activities, including twenty books and over one hundred and fifty journal articles. William C. Bauldry, Prof. Emeritus and Adjunct Research Prof. of Mathematics at Appalachian State University, received his Ph.D. in Approximation Theory from Ohio State. He has published many papers on pedagogy and technology, often using Maple, and has been the PI of several NSF-funded projects incorporating technology and modeling into math courses. He currently serves as Associate Director of COMAP's Math Contest in Modeling (MCM).

Please note that the Maple package PSM is now on the public area of the Maple Cloud. To access it:

1. Go to the website <https://maplecloud.com>
2. Click on packages in the left navigation pane
3. Click on PSM in the list of packages
4. Click the Download button to capture the package

From Maple:

1. Click on the Maple Cloud icon far right in the Maple window toolbar
- Or click on the Maple Cloud button on Maple's Start page to go to the website
2. Click on the packages in the navigation pane
3. Click on PSM in the list of packages

The package then downloads into Maple directly.

Advanced Problem Solving Using Maple William P. Fox, William Bauldry, 2020-11-09

Advanced Problem Solving Using Maple™ Applied Mathematics Operations Research Business Analytics and Decision Analysis applies the mathematical modeling process by formulating, building, solving, analyzing, and criticizing mathematical models. Scenarios are developed within the scope of the problem solving process. The text focuses on discrete dynamical systems, optimization techniques (single variable unconstrained optimization and applied problems) and numerical search methods. Additional coverage includes multivariable unconstrained and constrained techniques, linear algebra techniques to model and solve problems such as the Leontief model, and advanced regression techniques including nonlinear logistics and Poisson. Game theory, the Nash equilibrium, and Nash arbitration are also included.

Features: The text's case studies and student projects involve students with real world problem solving. Focuses on numerical solution techniques in dynamical systems, optimization, and numerical analysis. The numerical procedures discussed in the text are algorithmic and iterative. Maple is utilized throughout the text as a tool for computation and analysis. All algorithms are provided with step-by-step formats.
