**Rural STEM Education Research: Bridging between Uniqueness and Universality** Guan Saw, Angela Starrett, Audrey Meador, Hobart Harmon, 2026-01-23

The opposition between uniqueness and universality in rural science technology engineering mathematics and medicine STEM education research is an enduring feature of the field. Theories and methods developed to be universally applicable are constantly adopted or reimaged in studying and understanding certain unique STEM education phenomena or issues within and across rural contexts partly due to the vastness and variety that exists in what is labeled as rural and or STEM education. Research ideas and findings focused on a unique rural population or setting often can have universal implications for other rural and non rural populations or settings though not explicitly articulated in many publications. Striving to be both unique and universal is a fundamental challenge yet has the potential to advance knowledge and practice in the field of rural STEM education. The overall goal of this Research Topic is to introduce and explore the ideas of rural focused and rural reimaged approaches in potentially bridging the gaps between uniqueness and universality in STEM education research. Rural focused theories and constructs e.g. place based education, rural identity are centered around populations and issues in rural settings whereas rural reimaged theories and constructs e.g. urban rural spatial inequality, social capital, expectancy value beliefs are traditional theories and constructs that are reconceptualized to include rural perspectives in the studies. This Research Topic seeks articles that examine both the uniqueness and universality of rural STEM education and educational research utilizing rural focused and or rural reimaged lens or approaches. We particularly welcome articles that address unique assets, challenges, needs, opportunities and or lessons learned of rural STEM education while being situated in a broader research discipline as well as articles that explore the commonalities and connections across study cases, policies, programs, practices or contexts of rural STEM education. This Research Topic invites theoretical, methodological and empirical contributions addressing but not limiting to the following key topics: Rural focused topics: Defining rurality in STEM education, Defining STEM in rural areas, Place based STEM teaching learning etc, Rural STEM identity belonging etc, STEM education in rural serving postsecondary institutions, STEM education for local workforce development. Rural reimaged topics: Urban rural spatial inequality in rural STEM education, Community cultural wealth in rural STEM education, STEM funds of knowledge of rural learners, Underrepresentation of rural students in STEM education, Intersectionality in rural STEM education, Critical policy analysis in rural STEM education, Communities of practice in rural STEM education, Research practice partnerships for rural STEM education. Articles need to define rurality for interpretation by international readers and describe the uniqueness and universality of the research topics, theories, methods, findings and or implications in the context of rural STEM education.
