Mathematical Reviews, 2006 **SIAM Journal on Scientific Computing**, 2006 *Approximation of Large-Scale Dynamical Systems* Athanasios C. Antoulas, 2009-06-25 Mathematical models are used to simulate and sometimes control the behavior of physical and artificial processes such as the weather and very large scale integration VLSI circuits The increasing need for accuracy has led to the development of highly complex models However in the presence of limited computational accuracy and storage capabilities model reduction system approximation is often necessary *Approximation of Large Scale Dynamical Systems* provides a comprehensive picture of model reduction combining system theory with numerical linear algebra and computational considerations It addresses the issue of model reduction and the resulting trade offs between accuracy and complexity Special attention is given to numerical aspects simulation questions and practical applications
