Delivering Value with BIM Adriana Sanchez,Keith Hampson,Simon Vaux,2016-03-31 Building Information Modelling BIM is a global phenomenon which is gaining significant momentum across the world Currently there is little information on how to realise and monitor benefits from implementing BIM across the life cycle of a built environment asset This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory It presents an approach for practitioners aiming to implement BIM across the life cycle of built environment assets including both buildings and infrastructure Additionally

the book features wide ranging information about BIM the challenges of monitoring progress towards benefit goals and the greater context of implementation a set of dictionaries that illustrate how benefits can be achieved what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM real world examples from across the world and life cycle phases that show how these benefits can be achieved and information on international maturity and competency measures to complement the value realisation framework Including a blend of academic and industry input this book has been developed in close collaborative consultation with industry government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM related courses

The Influence of the Environment on the Successful Completion of Construction Projects Kethy Abraham,2014-02-03 Research Paper postgraduate from the year 2010 in the subject Environmental Sciences grade A The University of Chicago language English abstract All projects must take place within an environment The environment represents in this case are the external conditions that affect the development of any project Therefore these conditions may be economic political technological or social They make up the environment within which any project operates A project will in one way or the other be impacted by these factors during the course of the project cycle Fewings 2005 These factors will either impact the project negatively or positively and in the long run affect the completion of the project In real scenarios in project management the external conditions are risk factors which affect the completion of the project They act as risk factors because they will affect how the project is carried out In the case that these factors are not mitigated then it is not possible to have a successful project Halpin Senior 2010 People and communities also stay within the environment Development initiatives when initiated have an effect on the people who live within a given environment It is thus paramount these people are taken care of during the process of development in order to ensure minimal impact from these activities Klinger Susong 2006 This has led to the development of concepts such as the environmental impact assessment reports that are carried out to provide information on the impact of a project on the environment This is done so as to try and shield people from the effects that come from the continued development activities in the natural environment Himes 2008 The prep planning phase to the completion phase all interact with the environment The larger the project the higher the amount of activities involved within them These activities if not controlled could damage the environment to a big extent Construction projects interfere with so many things within the natural environment and this is what leads to resistance when the development of a new building is initiated The resistance first comes from the people who live close to the site Klinger Susong 2006 *Construction Statistics Annual* Great Britain,2008-08-28 This annual publication contains a broad range of statistics on trends in the construction industry in Britain over the last decade together with some international comparisons and features on leading initiatives for the future Issues covered include industry structure new
