Encyclopedia of Production and Manufacturing Management Paul M. Swamidass, 2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to

understand and implement these ongoing changes in the field Leading the Web in Concurrent Engineering Parisa Ghodous, Rose Dieng-Kuntz, Geilson Loureiro, 2006 Contains papers on the advances in Concurrent Engineering research and applications This book focuses on developing methodologies techniques and tools based on Web technologies required to support the key objectives of Concurrent Engineering **Modern Trends In Manufacturing Technology** Pradeep Chaturvedi, N.K. Tewari, G.S. Yadav, P.V. Rao, 1998 Manufacturing Systems: Theory and Practice George Chrissolouris, 2006-02-28 Manufacturing Systems Theory and Practice Second Edition provides an overview of manufacturing systems from the ground up It is intended for students at the undergraduate or graduate level who are interested in manufacturing industry practicing engineers who want an overview of the issues and tools used to address problems in manufacturing systems and managers with a technical background who want to become more familiar with manufacturing issues The book has six chapters that have been arranged according to the sequence used when creating and operating a manufacturing system Thus the subjects emphasised are the decision framework for manufacturing the manufacturing processes the manufacturing equipment and machine tools the design for manufacturing and the operation of manufacturing systems The book attempts a compromise between theory and practice in all addressed manufacturing systems issues covering a long spectrum of issues from traditional manufacturing processes to innovative technologies such as Virtual Reality Nanotechnology and Rapid Prototyping *Computer Integrated Manufacturing* Steven A.
