Streaming and Distributed Data Shima Zahmatkesh,Emanuele Della Valle,2020-01-21 This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention Answering in a timely fashion i e reactively is one of the most important performance indicators especially when the distributed data is evolving The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time A limited refresh budget guarantees the reactivity of the system Focusing on stream processing and Semantic Web it appeals to scientists and graduate students in the field **Media and Culture with 2013 Update** Richard

Campbell,Christopher R. Martin,Bettina Fabos,2012-02-20 Today s media landscape is changing faster than ever and students are experiencing these developments firsthand Media Culture pulls back the curtain on the media and shows students what all these new trends and developments really mean giving students the deeper insight and context they need to become informed media critics The 2013 Update also includes the must cover events and trends students need to know to become informed media consumers and critics from social media s influence on political events like the Occupy Wall Street movement and the Arab Spring revolutions and what the News Corp phone hacking scandal means for journalism to the continued growth of television streaming and apps and the advent of tablet only newspapers Read the preface *Forest and Stream* ,1894 **Streaming and Copyright Law** Lasantha Ariyaratna,2022-09-05 This book examines the challenges

posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the

European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright. By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses, it argues for strengthening end user rights. The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings, cinematographic films, and radio and television broadcasts is used on the internet. Superseding the conventional method of downloading, using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part. Conversely, the fair dealing defence in Australia cannot be used aptly to defend end users' acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire, or research or study. When considering a temporary copy exception, end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content, even if they lack any knowledge about the content's infringing nature. Moreover, the grey areas in circumventing geo-blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo-blocking. End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website blocking laws have emboldened copyright owners while suppressing end users' access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions.
