*MySQL Stored Procedure Programming* Guy Harrison, Steven Feuerstein, 2006-03-28 The implementation of stored procedures in MySQL 5.0 a huge milestone one that is expected to lead to widespread enterprise adoption of the already extremely popular MySQL database If you are serious about building the web based database applications of the future you need to get up to speed quickly on how stored procedures work and how to build them the right way This book destined to be the bible of stored procedure development is a resource that no real MySQL programmer can afford to do without In the decade since MySQL burst on the scene it has become the dominant open source database with capabilities and performance rivaling those of commercial RDBMS offerings like Oracle and SQL Server Along with Linux and PHP MySQL is at the heart of millions of applications And now with support for stored procedures functions and triggers in MySQL 5.0 MySQL offers the programming power needed for true enterprise use MySQL's new procedural language has a straightforward syntax making it easy to write simple programs But it's not so easy to write secure easily maintained high performance and bug free programs Few in the MySQL world have substantial experience yet with stored procedures but Guy Harrison and Steven Feuerstein have decades of combined expertise In *MySQL Stored Procedure Programming* they put that hard won experience to good use Packed with code examples and covering everything from language basics to application building to advanced tuning and best practices this highly readable book is the one stop guide to MySQL development It consists of four major sections MySQL stored programming fundamentals tutorial basic statements SQL in stored programs and error handling Building MySQL stored programs transaction handling built in functions stored functions and triggers

MySQL stored programs in applications using stored programs with PHP Java Perl Python and NET C and VB NET Optimizing MySQL stored programs security basic and advanced SQL tuning optimizing stored program code and programming best practices A companion web site contains many thousands of lines of code that you can put to use immediately Guy Harrison is Chief Architect of Database Solutions at Quest Software and a frequent speaker and writer on MySQL topics Steven Feuerstein is the author of Oracle PL SQL Programming the classic reference for Oracle stored programming for more than ten years Both have decades of experience as database developers and between them they have authored a dozen books

Repetitive Structures in Biological Sequences: Algorithms and Applications Marco Pellegrini, Alberto Magi, Costas S. Iliopoulos, 2016-10-27 Repetitive structures in biological sequences are emerging as an active focus of research and the unifying concept of repeatome the ensemble of knowledge associated with repeating structures in genomic proteomic sequences has been recently proposed in order to highlight several converging trends One main trend is the ongoing discovery that genomic repetitions are linked to many biological significant events and functions Diseases e.g Huntington's disease have been causally linked with abnormal expansion of certain repeating sequences in the human genome Deletions or multiple copy duplications of genes Copy Number Variations are important in the aetiology of cancer Alzheimer and Parkinson diseases A second converging trend has been the emergence of many different models and algorithms for detecting non obvious repeating patterns in strings with applications to in genomic data Borrowing methodologies from combinatorial pattern matching string algorithms data structures data mining and machine learning these new approaches break the limitations of the current approaches and offer a new way to design better trans disciplinary research The articles collected in this book provides a glance into the rich emerging area of repeatome research addressing some of its pressing challenges We believe that these contributions are valuable resources for repeatome research and will stimulate further research from bioinformatic statistical and biological points of view
