The Jet Race and the Second World War S. Mike Pavelec, 2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed

in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle s engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged throughout the war only rising to technological prominence on the ashes of the German defeat Pavelec s analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport *Automotive Engineering* ,1997 Willings Press Guide 2007 V1 Clare Redman,2007-02 This press guide aims to provide a comprehensive accurate and informative guide to the UK press both print and broadcast *Automotive Engineering International* ,2006 Willings Press Guide 2006 V1 United Kingdom Waymaker Publishing,2006-02 Now distributed by Thomson Gale the Willings Press Guide has been the world s leading international media directory for 125 years It provides extensive professionally researched coverage of the UK and international print media national and regional newspapers magazines periodicals and special interest titles **Porsche 911** John Conway,1988-10 Covers the entire range of Porsche supercars giving full technical information details of design and development performance evaluation cut away engine diagrams thrilling action photos 80 full color photos *Sportbike Performance Handbook* Kevin Cameron, **Beyond the Technology Race** Annemieke J. M. Roobeek,1990 During the 1980s governments in all industrial countries have tightened their grip on technological development This book illustrates the technology race between seven industrial countries in the field of information technology biotechnology and new materials However the analysis of a government s role in technological development goes beyond the simple comparison of financial efforts and policy measures The policies of seven countries are analysed in their specific national context and much attention is paid to the differences in industrial structure the different social and institutional settings and national traditions in government intervention In order to gain insight into the diffusion of new technologies and the shifts in international competitive relations it is necessary to focus on the social base for technological change among the industrial countries In this context there is fundamental work to do for economists political scientists sociologists policy makers technical engineers consultants managers in strategic planning and human resources and so on **Serials in the British Library** ,2008 **Autocar & Motor** ,1992-11-04 **Aviation Week, Including Space Technology** ,1930 Includes a mid December issue called Buyer guide edition **Autocar** ,2002
