Improving Modeling Tools to Assess Climate Change Effects on Crop Response Jerry L. Hatfield, David Fleisher, 2020-01-22 Crop model intercomparison and improvement are required to advance understanding of the impact of future climate change on crop growth and yield The initial efforts undertaken in the Agriculture Model Intercomparison and Improvement Project AgMIP led to several observations where crop models were not adequately simulating growth and development These studies revealed where enhanced efforts should be undertaken in experimental data to quantify the carbon dioxide temperature water interactions in plant growth and yield International leaders in this area held a symposium at the 2013 ASA CSSA and SSSA Annual Meeting to discuss this topic This volume in the Advances in Agricultural Systems Modeling series presents experimental observations across crops and simulation modeling outcomes and addresses future challenges in improving crop simulation models IN PRESS This book is being published according to the Just Published model with more chapters to be published online as they are completed Subsurface Characterization and Monitoring Techniques J. Exton,1977 Absorption spectroscopy utilizing a video sensing technique was investigated as a means of visualizing SO₂ in power plant stack plumes and for measuring SO₂ concentration and effluent velocity in these plumes The absorption of SO₂ is measured in the ultraviolet region by using the sky as a background source An additional spectral channel is used to correct for particulate scattering encountered in coal fired power plant plumes The video system also tracks fluctuations in the SO₂ concentration which leads to the determination of an eddy convection velocity Field measurements were performed to show

that the eddy convection velocity is proportional to the average in stack velocity and to empirically determine their relationship It was concluded that the video absorption technique is an attractive method for remotely determining both SO₂ concentration and plume velocity with the same instrument
