Rem Koolhaas:

Delirious New York Rem Koolhaas, 2014-07-01 Since its original publication in 1978 *Delirious New York* has attained mythic status. Back in print in a newly designed edition, this influential cultural, architectural, and social history of New York is even more popular, selling out its first printing on publication. Rem Koolhaas's celebration and analysis of New York depicts the city as a metaphor for the incredible variety of human behavior. At the end of the nineteenth century, population information and technology explosions made Manhattan a laboratory for the invention and testing of a metropolitan lifestyle: the culture of congestion and its architecture. Manhattan, he writes, is the 20th century's Rosetta Stone, occupied by architectural mutations: Central Park, the Skyscraper, utopian fragments, Rockefeller Center, the U N Building, and irrational phenomena. Radio City Music Hall, Koolhaas interprets and reinterprets the dynamic relationship between architecture and culture in a number of telling episodes of New York's history, including the imposition of the Manhattan grid, the creation of Coney Island, and the development of the skyscraper. *Delirious New York* is also packed with intriguing and fun facts and illustrated with witty watercolors and quirky archival drawings, photographs, postcards, and maps. The spirit of this visionary investigation of Manhattan equals the energy of the city itself.

Rem Before Koolhaas Rem Koolhaas, 2026-03-03 A compact primer on Koolhaas' early, lesser-known journalistic career. Before the Dutch architect Rem Koolhaas, born 1944, cofounded the architectural firm OMA in 1975, published seminal works of postmodern theory such as *Delirious New York* (1978), gained a professorship at Harvard University, and cofounded *Volume Magazine* (2005), he was a journalist. Between 1963 and 1968, Koolhaas regularly contributed to the Dutch weekly *Haagse Post*. His specialty was the interview. Through his deft powers of observation and analysis, the young Koolhaas employed the form to make visible power dynamics and cultural shifts. This pocket-size volume is the first to compile Koolhaas' interviews for the *Haagse Post*, reproducing their original layouts. Rather than treating this period as a mere precursor to his architectural career, *Rem Before Koolhaas* presents it as culminating in a valuable body of critical work that lent itself to his later endeavors.

Rem Koolhaas/OMA Rem Koolhaas, Francisco Asensio Cervera, Aurora Cuito, Office for Metropolitan Architecture, 2002 Rem Koolhaas, Rotterdam 1944 studied architecture at the AA in London, where he went on to become a lecturer, and at the IAUS in New York during Peter Eisenman's time there. Koolhaas has always been connected with the theory of architecture: as lecturer at the innovative AA, as a speaker, and with his published work. *Delirious New York*, a retrospective manifesto for Manhattan (1978), and the recent *S M L XL* (1995). In 1972, Koolhaas set up the OMA Office for Metropolitan Architecture, whose name clearly expresses the planning intentions of the team, comprising Koolhaas, Elia and Zoe Zenghelis, and Madelon Vriessendorp.

Junkspace with Running Room Rem Koolhaas, Hal Foster, 2016-09-13 *Junkspace* first appeared in the Harvard Design School Guide to Shopping (2001), a vast compendium of text, images, and data concerning the consumerist transformation of city and suburb from the first department store to the latest mega mall. The architect Rem Koolhaas itemized in *delirious* detail how our cities are being overwhelmed.

His celebrated jeremiad is updated here and twinned with Running Room a fresh response from the cultural critic Hal Foster Junkspace describes the bleak and featureless world of capitalism while Running Room seeks to find a space within the junk in which the individual might still exist **Rem Koolhaas/OMA** Roberto Gargiani,2006 *Six Canonical Projects by Rem Koolhaas* Ingrid Böck,2015 **OMA - Rem Koolhaas living** Rem Koolhaas,Arc en rêve centre d'architecture,1998

Rem Koolhaas: Rem Koolhaas,Sanford Kwinter,Rice University. School of Architecture,1996-03 Explaining architecture to students requires a clarity and economy of expression that is not always associated with architects perhaps this explains the popularity of our Conversations with Students series which are succinct informal introductions to the works of the world s greatest architects *Collours* Rem Koolhaas,2001 The nature of colour should change no longer just a thin layer of change but something that genuinely alters perception this stipulation of Rem Koolhaas is echoes by the world famous architects and designers Alessandro Mendini and Norman Foster In this volume they present between them a total of 90 colours each covering half a page accompanied by comments on the background the significance and the applications of the colours Studies of colours from each office form the basis of this book and were previously only available in extravagant individual editions With this comprehensive and consistent presentation of the varying approaches to colour we have a compendium
