LEADING IN THE AGE OF AI Surinder Lall,2026-03-13 Leading in the Age of AI By Surinder Lall We are entering a world where machines can think create and decide yet the real question is not what AI can do but how we choose to lead alongside it In Leading in the Age of AI cybersecurity and AI governance expert Surinder Lall draws on more than twenty five years of

experience advising global organisations governments and technology leaders This is not a technical manual It is a leadership playbook for a new era one where decisions made today will shape not just businesses but society itself Blending real world case studies with timeless philosophical insight the book explores what it means to lead responsibly in an age defined by intelligent systems It moves beyond theory to provide practical guidance on navigating risk building trust and making decisions under uncertainty when the pace of change often outstrips regulation and the consequences of failure are no longer contained At its core this book is about accountability It challenges leaders to think differently about power ethics and responsibility in a world where algorithms increasingly influence outcomes From AI governance and security to culture resilience and decision making under pressure it offers a grounded experience driven perspective on what effective leadership now demands This is not a book about the future It is about the choices we are already making and the kind of leaders we must become because of them   Legal, Regulatory and Ethical Non-binary Choices of the AI Act Tomasz Braun,Dominika Ewa Harasimiuk,2025-12-03 This book investigates the complex ethical dilemmas underpinning AI regulation analysing the EU Artificial Intelligence Act in the context of the fundamental values and ambitious expectations that have accompanied it initially This book posits a pioneering regulatory framework to ensure the ethical development and equitable deployment of AI technologies for societal benefit The expanding integration of AI and its deepening interaction with humans raise profound ethical dilemmas As legislators endeavour to address these rapid developments and ensure AI serves the public good and does not cause harm this book discusses the ethical complexities which pose a significant challenge for the EU and beyond The book posits the discussion on AI regulation in a broader global background and refers to human agency trustworthiness risk classifications the attribution of liability for deficiencies arising from its improper implementation and other problems that the AI based systems may cause Additionally it seeks to familiarise the reader with the AI Act and critically expands on the burdens the new law may impose on subjects This book will be of interest to researchers policymakers students and practitioners with an interest in the legal and ethical dimensions of technology law governance EU law and artificial intelligence The Open Access version of this book available at http www taylorfrancis com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
