Teaching Off Trail Peter Dargatz,2021-12-14 *Teaching Off Trail* describes the transformation of Peter Dargatz a national board certified teacher and public school coordinator from an anxious assessor to a fair and fun facilitator of learning It shares his personal professional journey detailing his evolution as an educator while simultaneously offering strategies for readers to implement Peter s unique teaching philosophy to increase opportunities for play creative expression and personalization in both the indoor and outdoor classroom In his own classroom Peter brought learning outside by creating a nature kindergarten program that emphasizes community partnerships service learning and meaningful and memorable experiences in the outdoors *Teaching Off Trail* aims to inspire educators administrators and parents across all levels to turn their outrage for today s educational system into outreach that promotes passionate and purposeful problem solving He incorporates techniques often seen in private educational settings like Reggio and Montessori student centered self directed experiential approaches to learning and shows how they work within a public school system

Learning to Change the World Walter Bender,Charles Kane,Jody Cornish,Neal Donahue,2012-12-11 UNESCO estimates that eleven percent of primary school age children seventy two million worldwide are not enrolled in or attending school Children who do attend may find themselves in schools that lack adequate space facilities or resources impossible situations for learning It is against this backdrop of profound need that One Laptop per Child OLPC emerged in 2005 The mission of the organization is to empower the children of developing countries to learn They created the first affordable netbook specifically built to withstand harsh climates and the handling of young children the bright green and white XO At the 2005 World Economic Forum Nicholas Negroponte the MIT researcher who co founded the Media Lab and OLPC introduced the XO laptop to the world and described a new approach to changing education in developing countries First children must have access to information through low cost data communications and the tools to educate themselves affordable computers and learning software Secondly the fundamental approach to education must shift from passive knowledge acquisition to active construction of knowledge learning how to learn Thirdly OLPC planned to build an organization with the capability to deliver these computers and support these shifts globally It was an audacious vision of how to bring about a massive educational change *Learning to Change the World* is the story of One Laptop per Child a story that will resonate with entrepreneurs and social innovators in any field OLPC is an example of a non profit organization with aspirations for systemic change on a global scale yet wrestling with tough questions that will be familiar to any social

entrepreneur how to ensure market forces support the scale up of a social program how to balance the need to repeat past successes but still leave room for innovation how to leverage a network to expand impact beyond your original capabilities and how to help people without creating dependence The authors set out to tell the real story of their journey both successes and failures For both ardent supporters and critics alike this book presents both an invitation and a challenge to set aside preconceived notions about OLPC and read the inside story of the origins and evolution of the organization *Dealerscope Consumer Electronics Marketplace* ,1997 PC Magazine ,2004 **The Differentiated Math Classroom** Miki Murray,2007 In every mathematics classroom the need for differentiated instruction is present in many it s acute Students learn at different rates in different ways with different successes and different challenges Instruction must be flexible enough to meet everyone s needs and nurturing enough to not only support growth but also address the frustration that often leads to mathphobia The Differentiated Math Classroom can help make high quality differentiated instruction a classroom reality It s the usable comprehensive resource teachers need to help students of all levels and abilities succeed with math Whether you teach math sixty minutes a day or six periods a day The Differentiated Math Classroom describes both the big ideas of differentiation and the day to day teaching that makes it work Miki Murray and Jenny Jorgensen present everything you need to get started and to help all students meet national standards including ideas for Setting up a classroom to maximize opportunities for differentiation and establish community Getting to know students strengths and needs through high quality assessments Devising anchor activities that help students work independently with meaningful math content while you free up time for individual instruction Creating tiered lessons that scaffold content and provide the flexibility to challenge some students and offer assistance to others Murray and Jorgensen offer practical ideas for planning and designing units that engage students and facilitate learning about important math concepts as well as teaching tools questions for professional reflection and answers to teachers most frequently asked questions about differentiation Discover that differentiated instruction is a flexible framework that supports all math learners Filled with examples from real classes and samples of student work The Differentiated Math Classroom will help every child learn more effectively by showing you how to think about students mathematics and your teaching in powerful new ways Glencoe Mathematics ,2001 **Mathematics** Barry Max Brandenberger,2002 This new series offers the most comprehensive views of key areas in the world of science Each set explores all facets of the topic offering not only descriptive and analytical information but also cultural and ethical issues and career opportunities in many fields of science *Teaching Learners who Struggle with Mathematics* Helene J. Sherman,Lloyd I. Richardson,George J. Yard,2009 This book was written to give teachers the tools they need to help students go from believing they can t do math to achieving real success and gaining confidence in their math skills This can be accomplished if parents and teachers instead of trying the same thing over and over again focus on how their students learn best To do this the authors present a systematic three step approach on how to assess student s strengths and weaknesses

and then plan instruction accordingly The three step plan involves 1 Creating a Data Analysis Sheet DAS 2 Considering the learners strengths and areas of concern 3 Completing a Mathematics Improvement Plan MIP Each chapter deals with a different mathematical topic place value problem solving fractions addition subtraction division decimals time and money etc A number of errors by a variety of students are described using a case study of a typical struggling student The text then explains how teachers can systematically assess the student s work and appropriately diagnose their problems By analyzing and understanding why and how their students make errors teachers can design appropriate ways to correct their mistakes and then promote long term learning through repetition and practice that is meaningful to them This book addresses mathematics education in a manner that encourages positive content growth and attitude for both teachers and students
