*Israel's Foreign Policy Towards the PLO* Amnon Aran, 2009 This detailed examination of Israeli foreign policy towards the Palestinian Liberation Organization PLO between the 1967 war and the 2005 withdrawal from the Gaza Strip focuses on the impact and process of

globalisation on the Israeli state's politics, economy, society and culture. In order to determine how interfacing developed between foreign policy and globalisation, a theoretical framework is presented that brings together two established approaches that hitherto have advanced in parallel: foreign policy analysis and globalisation theory. This is the first attempt within the discipline of International Relations to theorise the relationships between foreign policy and globalisation. Causal relationships underpinning Israeli foreign policy involving government, the state, the economy, social stratification and the media are linked to globalisation by specific example. Conventional accounts of this relationship strip military and political factors of any significance in terms of the conceptualisation of globalisation and its causes in favour of spatio-temporal and economic dimensions. The state is viewed as being compelled to transform in response to the pressures of globalisation. But in the case of Israel, the state acted proactively by using foreign policy towards the PLO as a key site of action to capture the opportunities and cope with the challenges presented by globalisation. To date, there have been only partial historical accounts of Israeli foreign policy towards the PLO in the context of globalisation. It is generally understood that foreign policy towards the PLO became entangled with globalisation due to the socio-economic and cultural globalisation of Israel in the mid-1980s, but this study shows that the increasing impact of military and political globalisation during the Cold War on the Arab-Israeli conflict resulted in Israeli foreign policy towards the PLO and globalisation effects in Israel becoming entwined from the early 1970s.

*Doing Political Science and International Relations* Heather Savigny, Lee Marsden, 2011-05-24. This is an ideal introduction for all embarking on a degree in Politics or International Relations. Starting from the premise that the doing of political science is an active and interactive process of critical evaluation, it addresses the crucial question of how, as well as what we should study. The book examines a wide range of theoretical perspectives and shows how they can be usefully applied to questions such as: Why do states go to war and in whose interests does the political system work? Chapters are organized by core areas of study such as power, the state, policy, institutions, the media, security, political economy and show how theories can be used and applied within each topic.
