Westerberg,2016-08-24 What s the best way to ensure that grading policies are fair accurate and consistent across classrooms How can schools transition to a grading system that better reflects what students are actually learning Tim R Westerberg makes this journey easier by offering a continuum of options with four destinations on the road to improved grading and assessment Destination 1 critically examines such popular grading mechanisms as the zero extra credit the semester killer project averaging mixing academic performance with work ethic and refusing to accept late work and explains how they undermine objectivity and instead result in widely divergent grades for comparable work with major consequences for students Destination 2 invites educators to put assessment and grading into the larger context of a districtwide guaranteed and viable curriculum and lays out the organizational conditions and necessary steps to accomplish this goal Destination 3 brings parents and others on board with a multiyear implementation plan and community engagement strategies for introducing report cards that indicate student achievement by standards rather than or in addition to letter grades Destination 4 competency based education involves a total rethinking of the nature and structure of school leading to individualized education for all students However far they choose to go administrators and teacher leaders can turn to

Assessment in the Classroom Peter W. Airasian,1996 The special mission of *Assessment in the Classroom* is to show how assessment principles apply to the full range of teacher decision making from organizing the class as a social system to planning and conducting instructions to the formal evaluation of learning and finally to grading The goal is to show students that assessment is an everyday ongoing part of their teaching not some esoteric affair that is divorced from their daily routine With this in mind the following features have been built into this text

In Teachers' Hands Richard J. Stiggins,Nancy Faires Conklin,1992-07-01 This book marks the starting point of a profound shift in assessment priorities detailing the results of a decade long program of research on classroom assessment environments It demonstrates how important sound classroom assessments are to student well being and provides insights into the complex demands of day to day classroom assessment on teachers who have been taught little about assessment in their training programs As a nation we spend billions of dollars on educational assessment including hundreds of millions for international and national assessments and additional hundreds of millions for statewide testing programs On top of these the standardized tests that form the basis of district wide testing programs represent a billion dollar industry If we total all of these expensive highly visible politically important assessments we still account for less than one percent of all the assessments conducted in America s schools The other 99 percent are conducted by teachers in their classrooms on a moment to moment day to day and week to week basis Paradoxically virtually all of our national state and local assessment resources are being devoted to research and development for large scale assessments This book provides specific action programs for improving the quality of the other 99 percent the assessments that really drive what students learn and how they feel about it
