ChatGPT eBook GURMEET SINGH DANG, **Building an Intelligent Enterprise with SAP Business AI** Avijit Dhar, 2026-02-13 Generative AI Gen AI represents a transformational technological shift by enabling the rapid creation of text images audio and video through learning from vast amounts of human generated data Unlike traditional programming that relies on explicit instructions Gen AI leverages machine learning to recognize patterns and generate content autonomously SAP has embraced this revolution with its SAP BTP Generative AI Hub a comprehensive platform designed to safely integrate generative AI and large language models into enterprise applications with seamless support across its product suite including S 4 HANA CRM and HXM This book provides a complete roadmap for understanding and applying these groundbreaking technologies It begins by exploring the origins and core concepts of AI deep learning and transformer architectures before delving into SAP s AI Core and Generative AI Hub offerings Through detailed step by step examples readers will learn to build enterprise use cases and discover the potential of Agentic AI for addressing real world business challenges making this a must read for professionals seeking to drive innovation and efficiency in their organizations You Will Gain a solid understanding of artificial intelligence deep learning and transformer architectures and how these concepts power generative AI Dive into SAP s innovative AI offerings exploring how the SAP BTP Generative AI Hub integrates generative AI and large language models safely into enterprise applications Understand how SAP s generative AI capabilities are embedded across its product suite including S 4 HANA CRM and HXM This book is for Enterprise IT Professionals and Developers Solution Architects **Unlocking the Potential of OpenAI's ChatGPT** DAVID YAO, Have you heard of OpenAI s ChatGPT but have no idea what it is or how to use it Look no further This book provides a comprehensive introduction to this revolutionary language model In this book the author takes you through the history of ChatGPT and its capabilities as well as its practical applications in fields such as customer service content creation and data analysis You ll also learn how ChatGPT works and what sets it apart from other language models But that s not all the book also provides hands on examples and tutorials to help you put your newfound knowledge into practice The author will also address the limitations of the model and provide tips on how to achieve optimal results Whether you re a data scientist business owner or student this book is a must read for anyone looking to understand and utilize the power of ChatGPT With its comprehensive understanding of ChatGPT and its potential to transform the way we work and learn this book is sure to be a valuable resource So why wait Get your hands on a copy today and let OpenAI s ChatGPT work for you [Proceedings of Topical Issues in International Political Geography \(TIPG 2024\)](#) Radomir Bolgov, Vadim Atnashev, Yury Gladkiy, Alexey Tsyb, Sergey Pogodin, Andrei Znamenski, Timo Duile, 2026-01-14 This proceedings book provides selections from the 2024 Topical Issues in International Political Geography TIPG meeting This book addresses the main issues of contemporary political geography and international relations providing a platform for discussion and collaboration between an international array of experts

primarily in the fields of political geography geopolitics and international relations The first section of this volume focuses on international relations with an explicit grounding in geographic space The second section then presents contributions that examine globalization and regionalism highlighting a historical framework for geography and politics Moving to an even more granular focus the third section presents chapters evaluating national policies and political institutions and the fourth introduces specific cases that illustrate culture as a factor of geography Finally contributions in the fifth section return to the macro scale discussing theoretical and historical issues at the intersection of politics geography and discourse

Introduction to Generative AI, Second Edition Numa Dhamani, 2026-01-13 Get up to speed quickly with generative AI AI tools like ChatGPT and Gemini automated coding tools like Cursor and Copilot and countless LLM powered agents have become a part of daily life They've also spawned a storm of misinformation hype and doomsaying that makes it tough to understand exactly what Generative AI actually is and what it can really do *Introduction to Generative AI Second Edition* delivers a clearly written survey of generative AI fundamentals along with the techniques and strategies you need to use AI safely and effectively In this easy to read introduction you'll learn How large language models LLMs work How to apply AI across personal and professional work The social legal and policy landscape around generative AI Emerging trends like reasoning models and vibe coding *Introduction to Generative AI Second Edition* guides you from your first eye opening interaction with tools like ChatGPT to how AI tools can transform your personal and professional life safely and responsibly This second edition has been completely revised to reflect the latest developments in the field from the latest innovations in prompt engineering and AI agents to fresh coverage of multimodal training reasoning models no code tools retrieval augmented generation RAG and more About the book *Introduction to Generative AI Second Edition* is an up to date guide to the capabilities risks and limitations of tools like ChatGPT Gemini and Claude This easy to follow guide moves quickly through the basics giving you the skills and understanding to use AI with confidence Along the way you'll explore how AI is impacting even established industries with an expert level look at global investment in AI AI education policy AI's economic impact and the ongoing legal and ethical issues of AI usage About the reader For anyone interested in generative AI No technical experience required About the author Numa Dhamani is a natural language processing expert working at the intersection of technology and society Maggie Engler is an engineer and researcher currently working on safety for large language models

Mastering AI for Strategic Business Success Jonas Debrulle, Loïc Plé, Elliroma Gardiner, 2025-10-14 In the rapidly evolving landscape of modern business artificial intelligence AI has emerged as a transformative force redefining how organizations operate compete and thrive The advent of AI has introduced unprecedented opportunities and challenges compelling business leaders to navigate a complex intersection of technology and strategy This book provides readers with the tools and perspectives necessary to harness the power of AI responsibly ethically and effectively ultimately driving strategic business success It is an indispensable and comprehensive resource for anyone seeking to understand the strategic

implications of AI its role in shaping the future of business and how to leverage AI for strategic advantage

Key Features

- Designed with alternating strategy and technology focused chapters that are tightly interwoven the text provides A clear integrated framework that links AI technologies directly to core strategic business decisions and operational actions
- Cutting edge case studies and examples illustrating how organizations across sectors are deploying AI to gain a competitive edge
- Companies discussed include amongst others Netflix Amazon Spotify Ocado the Adecco Group 9altitudes NatWest Group and AlterEos
- Pedagogical tools such as learning objectives real world examples and applications of AI and in depth discussions of technical aspects of AI support comprehension critical thinking and classroom discussion
- Digital support via McGraw Hill s Connect platform offering data driven simulations videos case studies and a wide bank of test questions for enhanced learning and engagement

Dr Jonas Debrulle is a Professor at I SEG School of Management in France and the Faculty of Economics and Business at KU Leuven in Belgium Previously he was Director of Programs at I SEG overseeing undergraduate and postgraduate programs He currently teaches international strategic management technology entrepreneurship and the impact of AI on business development

Dr Lo c Pl is a Professor of Strategic Management and Director of Teaching and Learning at IESEG School of Management He has a Ph D in Management Sciences from University Paris Dauphine PSL He created I SEG Center for Educational and Technological Innovation CETI in 2009 promoting the use of technology to benefit teaching and learning

Dr Elliroma Gardiner is an Organisational Psychologist and Associate Professor at QUT Business School in Australia With over 18 years of experience teaching and researching across Australia Asia and Europe she has held academic positions at the London School of Economics I SEG School of Management and Griffith University

ICT for Intelligent Systems Jyoti Choudrie,Eva Tuba,Thinagaran Perumal,Amit Joshi,2026-01-01 This book gathers papers addressing state of the art research in all areas of information and communication technologies and their applications in intelligent computing cloud storage data mining and software analysis It presents the outcomes of the 10th International Conference on Information and Communication Technology for Intelligent Systems ICTIS 2025 held in New York USA The book discusses the fundamentals of various data analysis techniques and algorithms making it a valuable resource for researchers and practitioners alike

Build AI-Enhanced Web Apps Theo Despoudis,2026-03-17 This book shows you step by step and example by example how to build sites and applications that take advantage of large language models LLMs like GPT Claude and Llama Written especially for web developers comfortable with React or Next.js this book introduces the tools and techniques you need to add sophisticated AI features like Retrieval Augmented Generation RAG document summarization chatbots and more to your web based projects It guides you through AI development using only JavaScript and other common web dev skills no Python or Machine Learning experience required You ll learn by working with full scale AI projects that solve actual business problems You ll soon be delivering user friendly efficient interfaces that make the absolute best use of AI tech In Build AI Enhanced Web Apps you ll learn how to Integrate AI models into React and

Next.js applications Implement streaming responses and real-time AI interactions Manage conversation history and context in chat applications Implement LangChain.js for complex AI workflows and reasoning Build a web application for summarizing documents using LangChain.js Utilize Retrieval-Augmented Generation (RAG) systems for knowledge management Develop an AI-powered interview preparation system with voice feedback About the technology The users have spoken Agents personalized responses and other LLM-powered features are required in modern web applications Build AI Enhanced Web Apps presents the end-to-end architecture of AI web apps including UI backend infrastructure data processing API integration deployment and scaling with examples and language perfect for professional web developers About the book This accessible book shows you how to ship real AI features not just toy demos using a JavaScript stack you already know React for UI Next.js for backend integration and the Vercel AI SDK to connect to LLMs like Gemini and GPT-4 In it you'll acquire the skills you need to complete two portfolio-ready projects a voice-based interview assistant and a RAG-powered corporate knowledge system You'll also learn how to design workflows that balance latency cost and UX and implement responsible guardrails for security quality control hallucinations and bias What's inside Build AI features using a professional stack Ship production-ready features Learn from concrete projects About the reader For web developers familiar with JavaScript and React About the author Theo Despoudis is a Senior Engineer at WP Engine specializing in AI-powered search and headless WordPress He is an expert in integrating LLMs RAG and Vercel AI SDK into React and Next.js apps

Simulation Modeling and Analysis, Sixth Edition Averill M. Law, 2025-02-21 Comprehensive state-of-the-art coverage of every important simulation technique This fully revised book has the most comprehensive and up-to-date coverage of all aspects of a simulation study Equally well-suited for use in university courses simulation practice and self-study the book offers clear and intuitive explanations as well as 300 figures 218 examples and 217 problems You will get detailed discussions on modeling and simulation simulation software model verification and validation input modeling random number and variate generation statistical design and analysis of simulation experiments experimental design simulation optimization agent-based simulation machine learning and much more Authored by an operations research analyst and industrial engineer with more than 40 years of experience *Simulation Modeling and Analysis* is widely regarded as the bible of simulation and now has more than 178,000 copies in print and 23,700 citations This sixth edition has been streamlined with several chapters downsized to eliminate outdated simulation programs or statistical techniques that are

rarely used in practice and are unnecessarily complicated Most analyses of simulation output data can now be done using three simple and familiar statistical formulas or expressions A new chapter covers AI and machine learning and their application to simulation Covers what are arguably the three most innovative and popular simulation software packages AnyLogic FlexSim and Simio Includes a set of instructor s resources Has been used at universities such as University of California Berkeley Stanford Georgia Tech Michigan Cornell Purdue Virginia Tech Penn State Wisconsin Columbia Texas A M Washington and Johns Hopkins Written by a world class expert in the field and an experienced educator who has presented more than 550 simulation and statistics short courses in 20 countries

2 The Last Invention The Impact Of Advanced Ai Francisco Jerbesson De Freitas Morais,2026-01-15 The Last Invention The Impact of Advanced Artificial Intelligence Humanity has always moved forward by creating tools But for the first time it has created something capable of thinking learning and deciding In The Last Invention readers are taken on a deep clear and forward looking exploration of the rise of advanced artificial intelligence and its irreversible consequences for civilization The book examines how AI has evolved from a simple technological tool into a global cognitive infrastructure transforming education labor economics governments art science and even the human mind itself With accessible language and strong technical rigor the work explores the historical evolution of artificial intelligence how neural networks and large language models truly function the rise of multimodal generative AI the direct impact of AI on the global economy professions and geopolitical power and the ethical social and human limits of this transformation Moving beyond both technological hype and dystopian fear the book presents a central argument the greatest risk of AI is not the machine itself but how humanity chooses to use it By addressing themes such as expanded cognition digital exclusion inclusive interfaces augmented humans and mental sovereignty the book reveals that AI can become either the greatest instrument of inclusion ever created or the most sophisticated mechanism of inequality in human history The Last Invention is

A Review of Recent Advancements in Deep Reinforcement Learning Artur Sahakjan,2018-08-02 Bachelor Thesis from the year 2018 in the subject Computer Science Commercial Information Technology grade 1 0 University of Duisburg Essen language English abstract Reinforcement learning is a learning problem in which an actor has to behave optimally in its environment Deep learning methods on the other hand are a subclass of representation learning which in turn focuses on extracting the necessary features for the task e g classification or detection As such they serve as powerful function approximators The combination of those two paradigm results in deep reinforcement learning This thesis gives an overview of the recent advancement in the field The results are divided into two broad research directions value based and policy based approaches This research shows several algorithms from those directions and how they perform Finally multiple open research questions are addressed and new research directions are proposed

Language Models Natural Language Processing in Action Second Edition has helped thousands of data scientists build machines that understand human language In this new and revised edition you ll discover state of the art Natural Language Processing NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more You ll create NLP tools that can detect fake news filter spam deliver exceptional search results and even build truthfulness and reasoning into Large Language Models LLMs In Natural Language Processing in Action Second Edition you will learn how to Process analyze understand and generate natural language text Build production quality NLP pipelines with spaCy Build neural networks for NLP using Pytorch BERT and GPT transformers for English composition writing code and even organizing your thoughts Create chatbots and other conversational AI agents In this new and revised edition you ll discover state of the art NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more Plus you ll discover vital skills and techniques for optimizing LLMs including conversational design and automating the trial and error of LLM interactions for effective and accurate results About the technology From nearly human chatbots to ultra personalized business reports to AI generated email news stories and novels natural language processing NLP has never been more powerful Groundbreaking advances in deep learning have made high quality open source models and powerful NLP tools like spaCy and PyTorch widely available and ready for production applications This book is your entrance ticket and backstage pass into the next generation of natural language processing About the book Natural Language Processing in Action Second Edition introduces the foundational technologies and state of the art tools you ll need to write and publish NLP applications You learn how to create custom models for search translation writing assistants and more without relying on big commercial foundation models This fully updated second edition includes coverage of BERT Hugging Face transformers fine tuning large language models and more What s inside NLP pipelines with spaCy Neural networks with PyTorch BERT and GPT transformers Conversational design for chatbots About the reader For intermediate Python programmers familiar with deep learning basics About the author Hobson Lane is a data scientist and machine learning engineer with over twenty years of experience building autonomous systems and NLP pipelines Maria Dyshel is a social entrepreneur and artificial intelligence expert and the CEO and cofounder of Tangible AI Cole Howard and Hannes Max Hapke were co authors of the first edition

How did Stanford continue to foster growth in Silicon Valley during the early 2000s?, 2025-10-01 Pre University Paper from the year 2024 in the subject Business economics Miscellaneous grade 1 0 language English abstract This research paper examines the symbiotic relationship between Silicon Valley and Stanford University and its impact on the startup scene in the early 2000s San Francisco Bay Area Furthermore a historical analysis of Stanford and Silicon Valley focuses on the deepened relationship these two entities have set up Additionally many companies that originated in Silicon Valley and have changed the world will be recognized Lastly the motivations and future directions of the Valley and Stanford will be explained The rise of massive open online courses MOOCs by universities such as Harvard

and MIT sends knowledge at no cost and might change the Valley for the time to come *The Human Use of Human Beings*
Norbert Wiener, 2025-08-12 For the 75th anniversary a new edition of *The Human Use of Human Beings* the landmark book that delves into the relationship between humans and computers and presciently anticipates many contemporary dilemmas surrounding AI technology With a new introduction by Brian Christian author of the bestselling *Algorithms to Live By* and *The Alignment Problem* In 1950 mathematician philosopher Norbert Wiener ended this classic book on the place of machines in society with a warning We shall never receive the right answers to our questions unless we ask the right questions The hour is very late and the choice of good and evil knocks at our door Wiener the founder of the science of cybernetics the study of the relationship between computers and the human nervous system was widely mislabeled as an advocate for the automation of human life As *The Human Use of Human Beings* reveals his vision was much more complex and interesting and is more relevant in today's world of AI than anyone could have anticipated In his new introduction Brian Christian aptly calls Wiener the progenitor of contemporary AI safety discourse Wiener hoped that machines would release people from relentless and repetitive drudgery to achieve more creative pursuits yet he anticipated the danger of dehumanizing and displacement His pioneering views on the human machine relationship as a communicative process are only more crucial now as we carry in our pockets AI devices that we can literally speak to His prescient warnings illuminate our contemporary relationships with language art and even social media *The Human Use of Human Beings* examines the implications of cybernetics for education law language science technology as Wiener anticipates the enormous impact in effect a third industrial revolution that the computer has had on our lives **Deep Learning with JAX** Grigory Sapunov, 2024-12-03

Accelerate deep learning and other number intensive tasks with JAX Google's awesome high performance numerical computing library The JAX numerical computing library tackles the core performance challenges at the heart of deep learning and other scientific computing tasks By combining Google's Accelerated Linear Algebra platform XLA with a hyper optimized version of NumPy and a variety of other high performance features JAX delivers a huge performance boost in low level computations and transformations In *Deep Learning with JAX* you will learn how to Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax Leverage libraries and modules from the JAX ecosystem *Deep Learning with JAX* is a hands on guide to using JAX for deep learning and other mathematically intensive applications Google Developer Expert Grigory Sapunov steadily builds your understanding of JAX's concepts The engaging examples introduce the fundamental concepts on which JAX relies and then show you how to apply them to real world tasks You'll learn how to use JAX's ecosystem of high level libraries and modules and also how to combine TensorFlow and PyTorch with JAX for data loading and deployment About the technology Google's JAX offers a fresh vision for deep learning This powerful library gives you fine control over low level processes like gradient calculations delivering fast and efficient model training and inference especially on large

datasets JAX has transformed how research scientists approach deep learning Now boasting a robust ecosystem of tools and libraries JAX makes evolutionary computations federated learning and other performance sensitive tasks approachable for all types of applications About the book Deep Learning with JAX teaches you to build effective neural networks with JAX In this example rich book you ll discover how JAX s unique features help you tackle important deep learning performance challenges like distributing computations across a cluster of TPUs You ll put the library into action as you create an image classification tool an image filter application and other realistic projects The nicely annotated code listings demonstrate how JAX s functional programming mindset improves composability and parallelization What s inside Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax About the reader For intermediate Python programmers who are familiar with deep learning About the author Grigory Sapunov holds a Ph D in artificial intelligence and is a Google Developer Expert in Machine Learning The technical editor on this book was Nicholas McGreivy Table of Contents Part 1 1 When and why to use JAX 2 Your first program in JAX Part 2 3 Working with arrays 4 Calculating gradients 5 Compiling your code 6 Vectorizing your code 7 Parallelizing your computations 8 Using tensor sharding 9 Random numbers in JAX 10 Working with pytrees Part 3 11 Higher level neural network libraries 12 Other members of the JAX ecosystem A Installing JAX B Using Google Colab C Using Google Cloud TPUs D Experimental parallelization

Managing and Using Information Systems Keri E. Pearson,Carol S. Saunders,Dennis F. Galletta,2023-12-27 Provides the knowledge and insights necessary to contribute to the Information Systems decision making process Managing Using Information Systems A Strategic Approach delivers a solid knowledgebase of basic concepts to help MBA students and general business managers alike become informed competent participants in Information Systems IS decisions Now in its eighth edition this fully up to date textbook explains the fundamental principles and practices required to use and manage information while illustrating how information systems can create or obstruct opportunities and even propel digital transformations within a wide range of organizations Drawing from their expertise in both academia and industry the authors discuss the business and design processes relevant to IS while presenting a basic framework that connects business strategy IS strategy and organizational strategy Step by step readers are guided through each essential aspect of Information Systems from fundamental information architecture and infrastructure to cyber security Artificial Intelligence AI business analytics project management platform and IS governance IS sourcing and more Detailed chapters contain mini cases full length case studies discussion topics review questions supplemental readings and topic specific managerial concerns that provide insights into real world IS issues Managing Using Information Systems A Strategic Approach Eighth Edition is an excellent textbook for advanced undergraduate and MBA level courses on IS concepts and managerial approaches to leveraging emerging information technologies
