*The Power of Middle School* Keen J. Babbage, 2012-09-14 The middle school years are a maze of academic duties human growth  
and self development discovering self identity and increasing social interaction with other people This maze can be an  
adventure of achievement and opportunity or it can be a struggle of difficulty and disappointment As these experiences are  
the impetus or foundation for many later achievements in academics careers and personal life it is imperative that educators  
maximize these formative years by helping middle school students successfully travel through this maze despite its ups and  
downs its twists and turns and its new challenges to master and the old issues to resolve For instance educators must  
support students who have fallen behind so as to thwart their reduced likelihood of turnaround in high school Likewise  
educators must challenge exceptional students in order to perpetuate their enthusiasm for learning and prepare them for  
college studies By discussing the comprehensive roles and duties of school administrators counselors and teachers The
