Science Experiments Review Setup:

Ethics and Experiments Scott Desposato, 2015-12-22 For most of political science's history discussions about professional ethics had nothing to do with human subjects Professional ethics involved integrity in the classroom fair tenure and promotion rule and the careful avoidance of plagiarism As most research was observational there was little need for attention to how scholarly activities might directly affect the subjects of our work Times have changed The dramatic growth in the use of experiments in social science especially overseas is generating unexpected ethical controversies The purpose of this volume is to identify debate and propose practical solutions to the most critical of these new ethical issues A leading team of internationally distinguished political science scholars presents the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies Part 1 examines contextual challenges provided by experiments conducted overseas questions of culture religion security and poverty Part 2 examines questions of legal constraints on research focusing on questions of foreign review of international experiments Part 3 tackles the critical issues in field experiments including deception and consent impact on elections and careers the boundaries of the public officials exemption and the use of partner organizations to avoid Institutional Review Body IRB review Part 4 considers strategies for the future including training and education IRB reform institutional changes and norm development

Expanding Perspectives on Open Science: Communities, Cultures and Diversity in Concepts and Practices L. Chan, F. Loizides, 2017-06-20 Twenty one years ago the term electronic publishing promised all manner of potential that the Web and network technologies could bring to scholarly communication scientific research and technical innovation Over the last two decades tremendous developments have indeed taken place across all of these domains One of the most important of these has been Open Science perhaps the most widely discussed topic in research communications today This book presents the proceedings of Elpub 2017 the 21st edition of the International Conference on Electronic Publishing held in Limassol Cyprus in June 2017 Continuing the tradition of bringing together academics publishers lecturers librarians developers entrepreneurs users and all other stakeholders interested in the issues surrounding electronic publishing this edition of the conference focuses on Open Science and the 27 research and practitioner papers and 1 poster included here reflect the results and ideas of researchers and practitioners with diverse backgrounds from all around the world with regard to this important subject Intended to generate discussion and debate on the potential and limitations of openness the book addresses the current challenges and opportunities in the ecosystem of Open Science and explores how to move forward in developing an inclusive system that will work for a much broader range of participants It will be of interest to all those concerned with electronic publishing and Open Science in particular Experiment Station Notes University of Wisconsin--Madison.
